A SHORT
TREATISE
On the GAME of
WHIST.
CONTAINING
The LAWS of the GAME:

AND ALSO

Some RULES, whereby a Beginner may, with due Attention to them, attain to the Playing it well.

CALCULATIONS for those who will bet the Odds on any Points of the Score of the Game then playing and depending.

CASES stated, to shew what may be effected by a very good Player in critical Parts of the Game.

REFERENCES to CASES, viz. at the End of the Rule, you are directed how to find them.

CALCULATIONS, directing with moral Certainty, how to play well any Hand or Game, by shewing the Chances of your Partner's having 1, 2, or 3 certain Cards.

With Variety of CASES added in the Appendix.

By EDMOND HOYLE, *Gent.*

The EIGHTH EDITION with great ADDITIONS.

The Laws of the Game, and an Explanation of the Calculations which are necessary to be understood by those who would play it well.

And also,

A DICTIONARY for WHIST, *which resolves almost all the critical Cases that may happen at the Game.*

To which is added,

An ARTIFICIAL MEMORY:

Or, an easy Method of assisting the Memory of those that play at the GAME of WHIST.

And several CASES, not hitherto published.

To this Edition are also added,

A whole Chapter of Thirteen new Cases, never publish'd before.

L O N D O N :

Printed for T. OSBORNE, at Gray's Inn. 1748.

ADVERTISEMENT.

THIS Book having been entered at Stationers Hall, according to Act of Parliament, whoever shall presume to Print or Vend a Pirate Edition, shall be Prosecuted according to Law.

The Proprietor has already obtained an Injunction against Nine Persons for pirating or selling pirated Editions.

To the READER.

THE Proprietor of the following Treatise has thought proper to give the Public Notice, that he has reduced the Price of it, that it may not be worth any Person's while to purchase the Pirated Editions, which have been already obtruded on the World; as likewise all those Piratical Editions are extremely incorrect; and that the Author will not undertake to explain any Case but in such Copies as have been set forth by himself, or that are Authorized as Revised and Corrected under his own Hand.

David Hoyle.

A SHORT
TREATISE

On the GAME of
WHIST.

THE Author of this Treatise did promise, if it met with Approbation, to make an Addition to it by way of APPENDIX, which he has done accordingly.

It is necessary to premise, that those, who intend to read this Treatise, are desired to peruse the following Calculations; and they need only charge their Memories with those that are marked with a *N. B.* upon which the whole Reasoning of this Treatise depends.

B

CAL.

CALCULATIONS, directing with moral Certainty, how to play well any Hand or Game, by shewing the Chances of your Partners having 1, 2, or 3 certain Cards,

For EXAMPLE.

I WOU'D know what is the Chance of his having one certain Card.

Answer.

against him for him

That he has it not is *N. B.*

2 to 1

II. I would know what is the Chance of his having two certain Cards?

Answer.

against him for him

That he has one of them only, is 31 to 26

That he has not both of them, 17 to 2

But that he has 1 or both is about } 25 to 32
5 to 4, or *N. B.*

III. I would also know, what are the Chances of his having 3 certain Cards?

Answer.

for him against him

That he holds one of them only, is 325 for him, to 378 against him, or about } 6 to 7

That he has not 2 of them only, }
is 156 for him, to 547 against him, or about } 2 to 7

That he has not all 3 of them, }
is 22 for him, to 681 against him, or about } 1 to 31

But

the. GAME of WHIST. 3

But that he has 1 or 2 of them, for him against him
 is 48 1 for him, to 22 2 against him, or about } 13 6

And that he has 1, 2, or all 3 }
 of them, is about N. B. } 5 2

*An Explanation and Application of the
 Calculations, necessary to be understood
 by those who are to read this Treatise.*

First CALCULATION.

IT is 2 to 1 that my Partner has not one certain Card.

To apply this Calculation, let us suppose the right-hand Adversary leads a Suit, of which you have the King, and one small Card only, you may observe that it is 2 to 1 by putting on your King, that the left-hand Adversary cannot win it.

Again, let us suppose that you have the King, and three small Cards of any Suit, likewise the Queen, and three small Cards of any Suit, I would know which is the best Suit to lead from ; *Answer*, from the King, because it is 2 to 1 that the Ace does not lye behind you ; but it is 5 to 4 that the Ace or King of any Suit, lies behind you, and consequently, by leading from your Queen-suit, you play to a Disadvantage.

2d. CALCULATION. It is 5 to 4 at least that your Partner has 1 Card out of any 2 certain Cards; the like Odds is in favour of your right-hand and left hand Adversaries; therefore, suppose you have 2 Honours in any Suit, and knowing it is 5 to 4 that your Partner holds one of the other 2 Honours, you do by this Knowledge, play your Game to a greater Degree of Certainty.

Again, let us suppose that you have the Queen and 1 small Card in any Suit only, and that your right-hand Adversary leads that Suit, if you put on your Queen, it is 5 to 4 that your left-hand Adversary can win it, and therefore you play 5 to 4 to your Disadvantage.

3d. CALCULATION. It is 5 to 2 that your Partner has 1 Card out of any 3 certain Cards.

Therefore, suppose you have the Knave and 1 small Card dealt you, and that your right-hand Adversary leads from that Suit, if you put on the Knave, it is 5 to 2 that your left-hand Adversary has either Ace, King, or Queen of the Suit led, and therefore you play 5 to 2 against yourself; besides, there is a further Consideration, by making a Discovery to your right-hand Adversary, he finessees upon your Partner throughout that whole Suit.

And

And in order to explain the Necessity there is, of putting the lowest of Sequences in all the Suits led, let us suppose that your Adversary led a Suit, of which you have King, Queen, and Knave, or Queen, Knave, and Ten ; by putting on your Knave of the Suit of which you have King, Queen, and Knave, it gives your Partner an Opportunity of calculating the Odds for and against him in that Suit, and also in all inferior Suits of which you have Sequences.

A farther Use to be made of the foregoing Calculation, let us suppose, that you have the Ace, King, and 2 small Trumps, with a Quint-major or 5 other winning Cards in your Hand in any Suit, and that you have played Trumps two Rounds, and that each Person followed Trumps ; in this Case, there are 8 Trumps out, and 2 Trumps remaining in your Hand, which make 10, and 3 Trumps which are divided between the remaining 3 Players, of which 3 Trumps the Odds is 5 to 2 in your Favour that your Partner has 1 ; and therefore out of 7 Cards in your Hand, you are intitled to win 5 Tricks.

2d. CALCULATION. It is 5 to 4 at least that your Partner has 1 Card out of any 2 certain Cards; the like Odds is in favour of your right-hand and left hand Adversaries; therefore, suppose you have 2 Honours in any Suit, and knowing it is 5 to 4 that your Partner holds one of the other 2 Honours, you do by this Knowledge, play your Game to a greater Degree of Certainty.

Again, let us suppose that you have the Queen and 1 small Card in any Suit only, and that your right-hand Adversary leads that Suit, if you put on your Queen, it is 5 to 4 that your left-hand Adversary can win it, and therefore you play 5 to 4 to your Disadvantage.

3d. CALCULATION. It is 5 to 2 that your Partner has 1 Card out of any 3 certain Cards.

Therefore, suppose you have the Knave and 1 small Card dealt you, and that your right-hand Adversary leads from that Suit, if you put on the Knave, it is 5 to 2 that your left-hand Adversary has either Ace, King, or Queen of the Suit led, and therefore you play 5 to 2 against yourself; besides, there is a further Consideration, by making a Discovery to your right-hand Adversary, he finesse upon your Partner throughout that whole Suit.

And

And in order to explain the Necessity there is, of putting the lowest of Sequences in all the Suits led, let us suppose that your Adversary led a Suit, of which you have King, Queen, and Knave, or Queen, Knave, and Ten ; by putting on your Knave of the Suit of which you have King, Queen, and Knave, it gives your Partner an Opportunity of calculating the Odds for and against him in that Suit, and also in all inferior Suits of which you have Sequences.

A farther Use to be made of the foregoing Calculation, let us suppose, that you have the Ace, King, and 2 small Trumps, with a Quint-major or 5 other winning Cards in your Hand in any Suit, and that you have played Trumps two Rounds, and that each Person followed Trumps ; in this Case, there are 8 Trumps out, and 2 Trumps remaining in your Hand, which make 10, and 3 Trumps which are divided between the remaining 3 Players, of which 3 Trumps the Odds is 5 to 2 in your Favour that your Partner has 1 ; and therefore out of 7 Cards in your Hand, you are intitled to win 5 Tricks.

6 *A short TREATISE on*

Some COMPUTATIONS for laying of your Money at the Game of WHIST. With the Deal.

The Deal	-	-	is 21 to 20
1 Love	-	-	11 10
2	-	-	5 4
3	-	-	3 2
4	-	-	7 4
5	is 2 to 1 of the Game, and 1 of the Lurch		} 2 1
6	-	-	5 2
7	-	-	7 2
8	-	-	5 1
9 is about	-	-	9 2

With the Deal.

4 to 3	-	-	is 7 to 6
5 3	-	-	7 5
6 3	-	-	7 4
7 3	-	-	7 3
8 3	-	-	7 2
9 3 is about	-	-	3 1

With the Deal.

5 to 4	-	is 6 to 5
6 4	-	6 4
7 4	-	2 1
8 4	-	3 1
9 4 is about	-	5 2

With the Deal.

6 to 5	-	is 5 to 4
7 5	-	5 3
8 5	-	5 2
9 5 is about	-	2 1

With the Deal.

7 to 6	-	is 4 to 3
8 6	-	2 1
9 6 is about	-	7 4

B 4

8 to 7 is above

9 to 7 is about

3 to 2

12 to 8

8 to 9, upon the best Computation made at present, is about 3 and a half in the Hundred, in favour of 8 with the Deal; against the Deal, the Odds is still, tho' small, in Favour of 8.

CHAP. I.

*Some GENERAL RULES to be observed
by BEGINNERS.*

I.

W H E N you lead, begin with the best Suit in your Hand ; if you have a Sequence of King, Queen, and Knave, or Queen, Knave, and Ten, they are sure Leads, and never fail gaining the Tenace to yourself or Partner in other Suits ; and begin with the highest of the Sequence, unless you have 5 in Number : In that Case play the lowest (except in Trumps, when you must always play the highest) in order to get the Ace or King out of your Partner's or Adversary's Hand, by which means you make Room for your Suit.

II.

If you have 5 of the smallest Trumps,
and not one good Card in the other Suits,
trump

trump out, which will have this good Consequence at least, to make your Partner the last Player, and by that Means gives him the Tenace.

III.

If you have 2 small Trumps only, with Ace and King of two other Suits, and a Deficiency of the fourth Suit, make as many Tricks as you can immediately; and if your Partner refuses either of your Suits, do not force him, because that may weaken his Game too much.

IV.

You need seldom return your Partner's Lead, if you have good Suits of your own to play, unless it be to endeavour to save or win a Game: What is meant by good Suits, is in case you shall have Sequences of King, Queen, and Knave, or Queen, Knave and Ten.

V.

If you have each 5 Tricks, and you are assured of getting 2 Tricks, in your own Hand, do not fail winning them, in Expectation of scoring 2 that Deal; because, if you lose the odd Trick, it makes 2 difference, and you play 2 to 1 against yourself.

An Exception to the foregoing Rule is, when you see a Probability either of saving your Lurch or winning the Game, in either of which Cases you are to risk the odd Trick.

VI.

When you have a Probability of winning the Game, always risk a Trick or two, because the Share of the Stake, which your Adversary has by a new Deal, will amount to more than the Point or two which you risk by that Deal.

The foregoing Case refers to Chap. VI. Case 1, 2, 3, 4, 5, 6.

VII.

If your Adversary is 6 or 7 Love, and you are to lead, your Business in that Case is to risk a Trick or two, in hopes of putting your Game upon an Equality ; therefore, admitting you have the Queen or Knave, and 1 other Trump, and no good Cards in other Suits, play out your Queen or Knave of Trumps, by which Means you will strengthen your Partner's Game, if he is strong in Trumps; if he is weak, you do him no Injury.

VIII.

If you are 4 of the Game, you must play for an odd Trick, because it saves one half of the Stake which you play for ; and, in order to win the odd Trick, tho' you are pretty strong in Trumps, be cautious how you trump out. What is meant by Strength in Trumps, is, in case you should have 1 Honour and 3 Trumps.

IX.

IX.

If you are 9 of the Game, and tho' very strong in Trumps, if you observe your Partner to have a Chance of trumping any of your Adversary's Suits ; in that Case do not trump out, but give him an Opportunity of trumping those Suits. If your Game is scored 1, 2, or 3, you must play the Reverse ; and also at 5, 6, or 7 ; because in these two last recited Cases you play for more than 1 Point.

X.

If you are last Player, and find that the third Hand cannot put on a good Card to his Partner's Lead, admitting you have no good Game of your own to play, return the Lead upon the Adversary, which gives your Partner the Tenace in that Suit, and often obliges the Adversary to change Suits, and consequently gains the Tenace in that new Suit also.

XI.

If you have Ace, King, and four small Trumps, begin with a small one ; because it is an equal Wager that your Partner has a better Trump than the last Player ; if so, you have three Rounds of Trumps ; if not, you cannot fetch out all the Trumps.

XII.

If you have Ace, King, Knave, and three small Trumps, begin with the King, and
then

then play the Ace, (except one of the Adversaries refuses Trumps) because the Odds is in your favour, that the Queen falls.

XIII.

If you have King, Queen, and four small Trumps, begin with a small one, because the Odds is on your Side that your Partner has an Honour.

XIV.

If you have King, Queen, Ten and three small Trumps, begin with the King, because you have a fair Chance that the Knave falls in the second Round, or you may wait to finesse your Ten upon the Return of Trumps from your Partner.

Refers to Chap. VII. Case 1, 2, 3.

XV.

If you have Queen, Knave, and four small Trumps, begin with a small one because the Odds is in your favour that your Partner has an Honour.

XVI.

If you have Queen, Knave, Nine, and three small Trumps, begin with the Queen, because you have a fair Chance that the Ten falls in the second Round; or you may wait to finesse the Nine.

Refers to Chap. VII. Case 1, 2, 3.

XVII.

If you have Knave, Ten, and four small Trumps,

Trumps, begin with a small one, for the Reasons assigned in N^o. 15.

XVIII.

If you have Knave, Ten, Eight, and three small Trumps, begin with the Knave, in order to prevent the Nine from making a Trick, and the Odds is in your favour that the three Honours fall in two Rounds.

XIX.

If you have six Trumps of a lower Denomination, you are to begin with the lowest, unless you should have Ten, Nine, and Eight, and an Honour turns up against you; in that Case, if you are to play through the Honour, begin with the Ten, which obliges the Adversary to play his Honour to his Disadvantage, or leave it in your Partner's Option whether he will pass it or not.

XX.

If you have Ace, King, and three small Trumps, begin with a small one, for the Reasons assigned in N^o. 15.

XXI.

If you have Ace, King, and Knave, and two small Trumps, begin with the King, which, next to a moral Certainty, informs your Partner that you have Ace and Knave remaining; and, by putting the Lead into your Partner's Hand, he plays you a Trump, upon which you are to finesse the Knave, and no ill Consequence can attend such Play, except the Queen lies behind you single.

Refers

Refers to Chap. VII. Case 1, 2, 3.
XXII.

If you have King, Queen, and three small Trumps, begin with a small one, for the assigned Reasons in N^o. 15.

XXIII.

If you have King, Queen, Ten, and two small Trumps, begin with the King, for the Reasons assigned in N^o. 21.

XXIV.

If you have Queen, Knave, and three small Trumps, begin with a small one, for the Reasons assigned in N^o. 15.

XXV.

If you have Queen, Knave, Nine, and two small Trumps, begin with the Queen, for the Reasons assigned in N^o. 16.

XXVI.

If you have Knave, Ten, and three small Trumps, begin with a small one, for the Reasons assigned in N^o. 15.

XXVII.

If you have Knave, Ten, Eight, and two small Trumps, begin with the Knave, because in two Rounds of Trumps it is Odds but that the Nine falls; or, upon the Return of Trumps from your Partner, you may finesse the Eight.

XXVIII.

If you have five Trumps of a lower Denomination, it is the best Play to begin with
the

the lowest, unless you have a Sequence of Ten, Nine, and Eight; in that Case, begin with the highest of the Sequence.

XXIX.

If you have Ace, King, and two small Trumps, begin with a small one, for the Reasons assigned in N^o. 15.

XXX.

If you have Ace, King, Knave, and one small Trump; begin with the King, for the Reasons assigned in No. 21.

XXXI.

If you have King, Queen, and two small Trumps, begin with a small one, for the Reasons assigned in N^o. 15.

XXXII.

If you have King, Queen, Ten, and one small Trump, begin with the King, and wait for the Return of Trumps from your Partner, when you are to finesse your Ten, in order to win the Knave.

XXXIII.

If you have Queen, Knave, Nine, and one small Trump, begin with the Queen, in order to prevent the Ten from making a Trick.

XXXIV.

If you have Knave, Ten, and two small Trumps begin with a small one, for the Reasons assigned in N^o. 15.

XXXV.

XXXV.

If you have Knave, Ten, Eight, and one small Trump, begin with the Knave, in order to prevent the Nine from making a Trick.

XXXVI.

If you have Ten, Nine, Eight, and one small Trump, begin with the Ten, which leaves it in your Partner's Discretion, whether he will pass or not.

XXXVII.

If you have Ten and three small Trumps, begin with a small one.

C H A P. II.

Some PARTICULAR RULES to be observed.

I.

IF you have Ace, King, and four small Trumps, with a good Suit, you must play three Rounds of Trumps, otherwise you may have your strong Suit trumped.

II.

If you have King, Queen, and four small Trumps, with a good Suit, trump out with the King, because when you have the Lead again, you will have three Rounds of Trumps.

III.

III.

If you have King, Queen, Ten, and three small Trumps, with a good Suit, trump out with the King, in Expectation of the Knave's falling at the second Round; and do not wait to finesse the Ten, for fear your strong Suit should be trumped.

IV.

If you have Queen, Knave, and three small Trumps, with a good Suit, trump out with a small one.

V.

If you have Queen, Knave, Nine, and two small Trumps, with a good Suit, trump out with the Queen, in Expectation of the Ten's falling at the second Round; and do not wait to finesse the Nine, but trump out a second time for the Reasons assigned in Case III. in this Chapter.

VI.

If you have Knave, Ten, and three small Trumps, with a good Suit, trump out with a small one.

VII.

If you have Knave, Ten, Eight and two small Trumps, with a good Suit, trump out with the Knave, in Expectation of the Nine's falling at the second Round.

VIII.

If you have Ten, Nine, Eight, and one
small

small Trump, with a good Suit, trump out with the Ten.

CHAP. III.

PARTICULAR GAMES, *and the Manner in which they are to be played, after a Learner has made some Progress in the Game.*

SUPPOSE you are elder Hand, and that your Game consists of King, Queen, and Knave, of one Suit, Ace, King, Queen, and two small Cards of another Suit, King and Queen of the third Suit, and three small Trumps : *Query*, How is this Hand to be played ? You are to begin with the Ace of your best Suit (or a Trump) which informs your Partner that you have the Command of that Suit ; but you are not to proceed with the King of the same Suit, but you must play a Trump next ; and if you find your Partner has no Strength to support you in Trumps, and that your Adversary plays to your weak Suit, *viz.* the King and Queen only, in that Case play the King of the Suit which belongs to the best Suit ; and if you observe a Probability of either your Adversaries being likely to trump that Suit, proceed then and play the King of the Suit of which you have King, Queen, and Knave. If it should

so happen, that you Adversaries do not play to your weakest Suit, in that Case, tho' apparently your Partner can give you no Assistance in Trumps, pursue your Scheme of trumping out as often as the Lead comes into your Hand : by which Means, supposing your Partner to have but two Trumps, and that your Adversaries have four each, by three Rounds of Trumps, there remain only two Trumps against you.

II.

Elder Hand.

Suppose you have Ace, King, Queen, and one small Trump, with a Sequence from the King of five in another Suit, with four other Cards of no Value. Begin with the Queen of Trumps, and pursue the Lead with the Ace, which demonstrates to your Partner that you have the King: And as it would be bad Play to pursue Trumps the third Round, till you have first gained the Command of your great Suit, by stopping thus, it likewise informs your Partner that you have the King and one Trump only remaining ; because, if you had Ace, King, Queen, and two Trumps more, and Trumps went round twice, you could receive no Damage by playing the King the third Round.

When

When you lead your Sequence, begin with the lowest, because if your Partner has the Ace, he plays it, which makes room for your Suit. And since you have let your Partner into the State of your Game, as soon as he has the Lead, if he has a Trump or two remaining, he will play Trumps to you, with a moral Certainty that your King clears your Adversaries Hands of all their Trumps.

III.

Second Player.

Suppose you have Ace, King and two small Trumps, with a Quint-Major of another Suit; in the third Suit you have three small Cards, and in the fourth Suit one. Your Adversary on your right-hand begins with playing the Ace of your weak Suit, and then proceeds to play the King: In that Case, do not trump it, but throw away a losing Card, and if he proceeds to play the Queen, throw away another losing Card; and do the like the fourth Time, in hopes your Partner may trump it, who will in that case play a Trump, or will play to your strong Suit: If Trumps are played, go on with them two Rounds, and then proceed to play your strong Suit, by which Means, if there happen to be four Trumps in one of Adversary's Hands, and two in the other, which is nearly the Case, your
Partner

Partner being intitled to have three Trumps out of the nine, consequently there remain only six Trumps between the Adversaries; your strong Suit forces their best Trumps, and you have a Probability of making the odd Trick in your own Hand only; whereas if you had trumped one of your Adversaries best Cards, you had so weakened your Hand, as probably not to make more than five Tricks without your Partner's Help.

IV.

Suppose you have Ace, Queen, and three small Trumps; Ace, Queen, Ten, and Nine of another Suit; with two small Cards of each of the other Suits: Your Partner leads to your Ace, Knave, Ten, and Nine; and as this Game requires rather to deceive your Adversaries, than to inform your Partner, put up the Nine, which naturally leads the Adversary to play Trumps, if he wins that Card. As soon as Trumps are played to you, return them upon your Adversary, keeping the Command in your own Hand. If your Adversary who led Trumps to you, puts up a Trump which your Partner cannot win, if he has no good Suit of his own to play, he will return your Partner's Lead, imagining that Suit lies between his Partner and yours; if this Finesse of yours should succeed, you will be a great Gainer by it, but scarcely possible to be a Loser.

V.

V.

Suppose you have Ace, King, and three small Trumps, with a Quart from a King, and two small Cards of another Suit, and one small Card to each of the other Suits; your Adversary leads a Suit of which your Partner has a Quart-Major; your Partner puts up the Knave, and then proceeds to play the Ace: You refuse to that Suit by playing your loose Card; when your Partner plays the King, your Right-hand Adversary trumps it, suppose with the Knave or Ten, do not over-trump him, which may probably lose you two or three Tricks by weakning of your Hand: But if he leads to the Suit of which you have none, trump it, and then play the lowest of your Sequence, in order to get the Ace either out of your Partner's or Adversaries Hand; which accomplished, as soon as you get the Lead, play two Rounds of Trumps, and then proceed to play your strong Suit. Instead of your Adversaries playing to your weak Suit, if he should play Trumps, do you go on with them two Rounds, and then proceed to get the Command of your strong Suit. But you will seldom find this last Method practised, except by moderate Players.

C H A P.

C H A P. IV.

Games to be played with certain Observations whereby you are assured that your Partner has no more of the Suit played either by yourself or him.

I. *First Example.*

SUPPOSE you lead from Queen, Ten, Nine, and two small Cards of any Suit; the second Hand puts on the Knave, your Partner plays the Eight; in this Case, you having Queen, Ten, and Nine, it is a Demonstration, if he plays well, that he can have no more of that Suit. Therefore, by that Discovery, you may play your Game accordingly, either by forcing him to trump that Suit if you are strong in Trumps, or by playing some other Suit.

II. *Second Example.*

Suppose you have King, Queen, and Ten of a Suit, and you lead your King, your Partner plays the Knave, this demonstrates he has no more of that Suit.

III. *Third Example, which varies from the two former.*

Suppose you have King, Queen, and many more of a Suit, and you begin with
the

the King, in some Cases it is good Play in a Partner, when he has the Ace and one small Card in that Suit only, to win his Partner's King with his Ace; for suppose he is very strong in Trumps, by taking his Partner's King with the Ace, he trumps out, and after he has cleared the Board of Trumps, he returns his Partner's Lead and having parted with the Ace of that Suit, he has made room for his Partner to make that whole Suit, which possibly could not have been done if he had kept the Command in his Hand.

And supposing his Partner has no other good Card in his Hand besides that Suit, he loses nothing by the Ace's taking of his King; but if it should so happen that he has a good Card to bring in that Suit, he gains all the Tricks which he makes in that Suit, by this Method of Play; and as your Partner has taken your King with the Ace, and trumps out upon it, you have Reason to judge he has one of that Suit to return you, therefore do not throw away any of that Suit, even to keep a King or Queen guarded.

C H A P.

CHAP. V.

Particular Games both to endeavour to deceive and distress your Adversaries, and to demonstrate your Game to your Partner.

I. *First Example.*

SUPPOSE I play the Ace of a Suit of which I have Ace, King, and three small ones; the last Player does not chuse to trump it, having none of the Suit; if I am not strong enough in Trumps, I must not play out the King, but keep the Command of that Suit in my Hand by playing of a small one, which I must do in order to weaken his Game.

II. *Second Example.*

If a Suit is led of which I have none, and a moral Certainty that my Partner has not the best of that Suit, in order to deceive the Adversary I throw away my strong Suit; but to clear up Doubts to my Partner, when he has the Lead I throw away my weak Suit. This Method of Play will generally succeed, unless you play with very good Players, and even with them, you will oftner gain than lose by this Method of Play.

CHAP. VI.

Particular Games to be played, by which you run the Risk of losing one Trick only to gain three.

I. *First Example.*

SUPPOSE Clubs to be Trumps, a Heart is played by your Adversary; your Partner having none of that Suit, throws away a Spade; you are then to judge his Hand is composed of Trumps and Diamonds; and suppose you win that Trick, and being too weak in Trumps, you dare not force him; and suppose you shall have King, Knave, and one small Diamond; and further suppose your Partner to have Queen and five Diamonds; in that Case, by throwing out your King in your first Lead, and your Knave in your second, your Partner and you may win five Tricks in that Suit; whereas if you had led a small Diamond, and your Partner's Queen having been won with the Ace, the King and Knave remaining in your Hand, obstructs his Suit: And tho' he may have the long Trump, yet, by playing a small Diamond, and his long Trump having been forced out of his Hand, you lose by this Method of Play three Tricks in that Deal.

II. *Second Example.*

Suppose, in the like Case of the former, you should have Queen, Ten, and one small Card in your Partner's strong Suit; which is to be discovered by the former Example; and suppose your Partner to have Knave and five small Cards in his strong Suit; you having the Lead are to play your Queen, and when you play again you are to play your Ten; and suppose him to have the long Trump, by this Method he makes four Tricks in that Suit, but should you play a small one in that Suit, his Knave being gone, and the Queen remaining in your Hand in the second Round of playing that Suit, and the long Trump being forced out of his Hand, the Queen remaining in your Hand obstructs the Suit, by which Method of Play you lose three Tricks in that Deal.

III. *Third Example.*

In the former Examples you have been supposed to have had the Lead, and by that Means have had an Opportunity of throwing out the best Cards in your Hand of your Partner's strong Suit, in order to make room for the whole Suit, we will now suppose your Partner is to lead, and in the Course of Play, it appears to you that your Partner has one great Suit; suppose,

pose, Ace, King, and four small ones, and that you have Queen, Ten, Nine, and a very small one of that Suit; when your Partner plays the Ace, you are to play the Nine; when he plays the King, you are to play the Ten; by which means you see, in the third Round, you make your Queen, and having a small one remaining, you do not obstruct your Partner's great Suit; whereas if you had kept your Queen and Ten, and the Knave have fallen from the Adversaries, you had lost two Tricks in that Deal.

IV. Fourth Example.

Suppose in the course of Play, as in the former Case you find your Partner to have one great Suit, and that you have King, Ten, and a small one of that Suit, your Partner leads the Ace, in that Case play your Ten, and in the second Round your King; this Method is to prevent a Possibility of obstructing your Partner's great Suit.

V. Fifth Example.

Suppose your Partner has Ace, King, and four small Cards in his great Suit, and that you have Queen, Ten, and a small Card in that Suit; when he plays his Ace, do you play your Ten, and when he plays his King, do you play your Queen; by which
Method

Method of Play you only risk one Trick to get four.

VI. Sixth Example.

We will now suppose you to have five *Cards* of your Partner's strong Suit, *viz.* Queen, Ten, Nine, Eight, and a small one; and that your Partner has Ace, King, and four small ones; when your Partner plays the Ace, do you play your Eight; when he plays the King, do you play your Nine; and in the third Round, no body having any of that Suit, except your Partner and you, proceed then to play the Queen, and then the Ten; and having a small one remaining, and your Partner two, you thereby gain a Trick, which you could not have done but by playing the high Cards, and by keeping a small one to play to your Partner.

C H A P. VII.

Particular Games to be played when your Adversary turns up an Honour on your right Hand, with DIRECTIONS how to play when an Honour is turned up on your left Hand.

I. First Example.

SUPPOSE the Knave is turned up on your right Hand, and that you have

King, Queen and Ten, in order to win the Knave, begin to play with your King, by which Method of Play, your Partner may suppose you to have Queen and Ten remaining, especially if you have a second Lead, and that you do not proceed to play your Queen.

II. Second Example.

The Knave being turned up as before, and that you have Ace, Queen, and Ten, by playing of your Queen, it answers the like Purpose of the former Rule.

III. Third Example.

If the Queen is turned up on your right Hand, and that you have Ace, King, and Knave, by playing your King, it answers the like Purpose of the former Rule.

IV. Fourth Example.

Suppose an Honour is turned up on your left Hand, and suppose you should hold no Honour, in that Case you are to play Trumps through that Honour; but in Case you should hold an Honour (except the Ace) you must be cautious how you play Trumps, because, in Case your Partner holds no Honour, your Adversary will play your own Game upon you.

C H A P.

CHAP. VIII.

A CASE to demonstrate the Danger of forcing your Partner.

SUPPOSE *A* and *B* Partners, and that *A* has a Quint-major in Trumps, with a Quint-major, and three small Cards of another Suit, and that *A* has the Lead ; and let us suppose the Adversaries *C* and *D* to have only five Trumps in either Hand : In this Case, *A* having the Lead, wins every Trick.

II.

Suppose, on the contrary, *C* has five small Trumps, with a Quint-major and three small Cards of another Suit, and that *C* has the Lead, who forces *A* to trump first, by which means *A* wins only five Tricks.

III.

A CASE to demonstrate the Advantage by a Saw.

Suppose *A* and *B* Partners, and that *A* has a Quart-major in Clubs, they being Trumps, another Quart-major in Hearts, another Quart-major in Diamonds, and the Ace of Spades : And let us suppose the Adversaries *C* and *D* to have the following Cards, viz. *C* has four Trumps, eight

C 4

Hearts

Hearts and one Spade ; *D* has five Trumps and eight Diamonds ; *C* being to lead, plays an Heart, *D* trumps it ; *D* plays a Diamond, *C* trumps it ; and thus pursuing the Saw, each Partner trumps a Quart-Major of *A*'s, and *C* being to play at the ninth Trick, plays a Spade, which *D* trumps ; thus *C* and *D* have won the nine first Tricks, and leave *A* with his Quart-major in Trumps only.

The foregoing *Case* shews, that whenever you gain the Advantage of establishing of a Saw, it is your Interest to embrace it.

[What follows in this Treatise is the Addition promised.]

CH A P. IX.

Containing Variety of CASES, intermixed with CALCULATIONS, demonstrating when it is proper, at second Hand, to put up the King, Queen, Knave, or Ten, with one small Card of any Suit, &c.

SUPPOSE you have four small Trumps ; in the three other Suits you have one Trick secure in each of them ; and suppose your Partner has no Trump, in that Case
the

the remaining Nine Trumps must be divided between your Adversaries, suppose five in one Hand, and four in the other, as often as you have the Lead, play Trumps; and suppose you should have four Leads, in that Case, you see your Adversaries make only five Tricks out of nine Trumps; whereas if you had suffered them to make their Trumps single, they might possibly have made nine Tricks.

By this Example, you see the Necessity there is of taking out two Trumps for one upon most Occasions.

Yet there is an Exception to the foregoing Rule, because if you find in the course of Play that your Adversaries are very strong in any particular Suit, and that your Partner can give you no Assistance in that Suit, in such a Case you are to examine your own, and also your Adversaries Scores, because by keeping one Trump in your Hand to trump such Suit, it may be either a means to save or win a Game.

II.

Suppose you have Ace, Queen, and two small Cards of any Suit; your right-hand Adversary leads that Suit; in that Case, do not put up your Queen, because it is an equal Wager that your Partner has a better Card in that Suit than the third Hand; if so, you have the Command of that Suit.

An Exception to the foregoing Rule is in case you want the Lead, then you are to put up your Queen.

III.

Never choose to lead from King, Knave, and one small Card in any Suit, because it is 2 to 1 that your Partner has not the Ace, and also 32 to 25, or about 5 to 4, that he has Ace or Queen; and therefore as you have only about 5 to 4, in your Favour, and as you must have four Cards in some other Suit, suppose the Ten to be the highest, lead that Suit, because it is an equal Wager that your Partner has a better Card in that Suit than the last Player; and if the Ace of the first-mentioned Suit lies behind you, which is an equal Wager it should so happen, in case your Partner has it not, in this Case, on your Adversaries leading this Suit, you probably make two Tricks in it by this Method of Play.

IV.

Suppose in the Course of Play it appears to you, that your Partner and you have four or five Trumps remaining, when your Adversaries have none, and that you have no winning Card in your Hand, but that you have Reason to judge your Partner has a thirteenth Card, or some other winning Card in his Hand; in that Case play a small Trump, to put the Lead into his Hand, in order

order to throw away any losing Card in your Hand, upon such thirteenth or other good Card.

C H A P. X.

Some Directions for putting up at second Hand, King, Queen, Knave, or Ten, of any Suit, &c.

I.

SUPPOSE you have the King, and one small Card of any Suit, and that your right-hand Adversary plays that Suit; if he is a good Player do not put up the King, unless you want the Lead, because a good Player seldom leads from a Suit of which he has the Ace, but keeps it in his Hand (after the Trumps are played out) to bring in his strong Suit.

II.

Suppose you have a Queen and one small Card of any Suit, and that your right-hand Adversary leads that Suit; do not put on your Queen, because suppose the Adversary has led from the Ace and Knave, in that Case, upon the Return of that Suit, your Adversary finessees the Knave, which is generally good Play, especially if his Partner has played the King, you thereby make your Queen; but by putting on the Queen, it shews your Adversary that you have no Strength in that Suit, and consequently puts him upon finessing upon your Partner throughout that whole Suit.

III.

In the former Examples you have been informed when it is thought proper to put up the King or Queen at second Hand; you are likewise to observe, in case you should have the Knave or Ten of any Suit, with a small Card of the same Suit, it is generally bad Play to put up either of them at second Hand, because it is five to two that the third Hand has either Ace, King, or Queen of the Suit led; it therefore follows, that as the Odds against you is five to two, and tho' you should succeed sometimes by his Method of Play, yet in the main you must be a Loser, because it demonstrates to your Adversaries that you are weak in that Suit, and consequently they fines upon your Partner throughout that whole Suit.

IV.

Suppose you have Ace, King, and three small Cards of a Suit, your right-hand Adversary leads that Suit; upon which you play your Ace, and your Partner plays the Knave. In case you are strong in Trumps, you are to return a small one in that Suit, in order to let your Partner trump it: And this Consequence attends such Play, *viz.* you keep the Command of that Suit in your own Hand, and at the same Time, it gives your Partner an Intimation that you are strong in Trumps; and therefore, he may play

play his Game accordingly, either in attempting to establish a Saw, or by trumping out to you, if he has either Strength in Trumps, or the Command of the other Suits.

V.

Suppose *A* and *B*'s Game is scored 6, the Adversaries *C* and *D* is scored 7, and that 9 Cards are played out, of which *A* and *B* have won 7 Tricks, and suppose no Honours are reckoned in that Deal; in this Case *A* and *B* have won the odd Trick, which puts their Game upon an Equality; and suppose *A* to have the Lead, and that *A* has two of the smallest Trumps remaining, with two winning Cards of other Suits; and suppose *C* and *D* have the two best Trumps between them, with two other winning Cards in their Hands, *Query*, How are you to play this Game? It is 11 to 3 that *C* has not the 2 Trumps; and, likewise, 11 to 3 that *D* has them not: The Odds being so much in *A*'s Favour to win the whole Stake, it is his Interest to play a Trump; for suppose the Stake to be 70*l*. depending, *A* wins the whole Stake, if he succeeds by this Method of play; but should he play the close Game, by forcing *C* or *D* to trump first, he having won the odd Trick already, and being sure of winning two more in his own Hand, by this Method his Game will be scored 9 to 7, which is about

bout 3 to 2, and therefore, *A*'s Share of the 70%. will amount only to 42%. and, by this Method, *A* only secures 7%. Profit; but in the other Case, upon supposition that *A* and *B* have 11. to 3 of the Stake depending, as aforesaid, by playing his Trump, he is intitled to 55%. out of the 70%. depending.

The foregoing Case being duly attended to, may be applied to the like Purpose, in other Parts of the Game.

CHAP. XI.

Some DIRECTIONS how to play when an Ace, King, or Queen, are turned up on your Right-Hand, &c.

SUPPOSE the Ace is turned up on your Right-hand, and that you have the Ten and Nine of Trumps only, with Ace, King and Queen of another Suit, and eight Cards of no Value, *Query*, How must this Game be played? Begin with the Ace of the Suit of which you have Ace, King, and Queen, which is an Information to your Partner that you have the Command of that Suit; then play your Ten of Trumps, because it is five to two that your Partner has King, Queen, or Knave of Trumps; and tho' it is about seven to two that your Partner has not two Honours, yet, should he
 chance

chance to have them, and they prove to be the King and Knave, in that Case as your Partner will pass your Ten of Trumps, and as it is 13 to 12 against the last Player for holding the Queen of Trumps, upon supposition your Partner has it not, in that Case, when your Partner has the Lead, he plays to your strong Suit, and upon your having the Lead, you are to play the Nine of Trumps, which puts it in your Partner's Power to be almost certain of winning the Queen, if he lies behind it.

The foregoing Case shews, that turning up of an Ace against you, may be made less beneficial to your Adversaries, provided you play by this Rule.

II.

If the King or Queen are turned up on your Right-hand, the like Method of Play may be made use of ; but you are always to distinguish the Difference of your Partner's Capacity, because a good Player will make a proper Use of such Play, but a bad one seldom, if ever.

III.

Suppose the Adversary on your Right-hand leads the King of Trumps, and that you should have the Ace and four small Trumps, with a good Suit ; in this Case it is your Interest to pass the King ; and tho' he should have King, Queen, and Knave

Knave of Trumps, with one more, if he is a moderate Player, he will play the small one, imagining that his Partner has the Ace; when he plays the small one, you are to pass it, because it is an equal Wager that your Partner has a better Trump than the last Player; if so, and that he happens to be a tolerable Player, he will judge you have a good Reason for this Method of Play, and consequently, if he has a third Trump remaining, he will play it, if not, he will play his best Suit.

IV.

A Critical CASE to win an odd Trick.

Suppose *A* and *B* Partners against *C* and *D*, and suppose the Game to be Nine all, and suppose all the Trumps are played out, *A* being the last Player, has the Ace and four other small Cards of a Suit in his Hand, and one thirteenth Card remaining; *B* has only two small Cards of *A*'s Suit; *C* has Queen and two other small Cards of that Suit; *D* has King, Knave, and 1 small Card of the same Suit. *A* and *B* have won 3 Tricks, *C* and *D* have won 4 Tricks; it therefore follows, that *A* is to win 4 Tricks out of the six Cards in his Hand, in order to win the Game. *C* leads this Suit, and *D* puts up the King; *A* gives him that Trick, *D* returns that Suit, *A* passes it, and *C* puts up his

his Queen : Thus C and D have won six Tricks, and C imagining the Ace of that Suit to be in his Partner's Hand, returns it, by which means A wins the 4 last Tricks, and consequently the Game.

V.

Suppose you should have the King and five small Trumps, and that your Right-hand Adversary plays the Queen ; in that Case do not put on your King, because it is an equal Wager that your Partner has the Ace ; and suppose your Adversary shou'd have Queen, Knave, Ten, and one small Trump, it is also an equal Wager that the Ace lies single, either in your Adversaries Hand or Partner's ; in either of which Cases it is bad Play to put on your King ; but if the Queen of Trumps is led, and that you should happen to have the King, with two or three Trumps, it is the best Play to put on the King, because it is good Play to lead from the Queen and one small Trump only ; and in that Case, shou'd your Partner have the Knave of Trumps, and your Left-hand Adversary hold the Ace, your neglecting to put on the King is the Loss of a Trick.

C H A P. XII.

The Ten or Nine being turn'd up on your Right-hand, &c.

I.

SUPPOSE the Ten is turned up on your Right-hand, and that you shou'd have King, Knave, Nine, and two small Trumps, with eight other Cards of no Value, and that it is proper for you to lead Trumps; in that Case, begin with the Knave, in order to prevent the Ten from making of a Trick; and tho' it is about five to four that your Partner hold an Honour, yet if that should fail, by finessing your Nine on the Return of Trumps from your Partner, you have the Ten in your Power.

II.

The Nine being turned up on your Right-hand, and that you should have Knave, Ten, Eight, and two small Trumps, by leading the Knave it answers the like Purpose of the former Case.

III.

You are to make a wide Difference between a Lead of Choice, and a forced Lead of your Partner's; because in the first Case he is supposed to lead from his best Suit, and finding you deficient in that Suit, and not being strong enough in Trumps, and

not

not daring to force you, he then plays his next best Suit, by which Alteration of Play it is next to a Demonstration that he is weak in Trumps; but should he persevere, by playing of his first Lead if he is a good Player, you are to judge him strong in Trumps, and it is a Direction for you to play your Game accordingly.

IV.

There is nothing more pernicious at the Game of Whist, than to change Suits often; because in every new Suit you run the Risk of giving your Adversary the Tenace; and therefore, though you lead from a Suit of which you have the Queen, Ten, and three small ones, and your Partner puts up the Nine only, in that Case, if you should happen to be weak in Trumps, and that you have no tolerable Suit to lead from, it is your best Play to pursue the Lead of that Suit, by playing your Queen, which leaves it in your Partner's Option whether he will trump it or not, in case he has no more of that Suit; but in your second Lead, in case you should happen to have the Queen or Knave of any other Suit, with one Card only of the same Suit, it would be better Play to lead from your Queen or Knave of either of these Suits, it being 5 to 2 that your Partner has one Honour at least in either of those Suits.

If you have Ace, King, and one small Card of any Suit, with four Trumps ; if your right-hand Adversary leads that Suit, pass it, because it is an equal Wager that your Partner has a better Card in that Suit than the third Hand ; if so, you gain a Trick by it ; if otherwise, as you have four Trumps, you need not fear to lose by it, because when Trumps are played, you may be supposed to have the long Trump.

C H A P. XIII.

A CAUTION not to part with the Command of your Adversaries great Suit, &c.

I.

IN Case you are weak in Trumps, and that it does not appear that your Partner is very strong in them, be very cautious how you part with the Command of your Adversary's great Suit: For suppose your Adversary plays a Suit of which you have King, Queen, and one small Card only, the Adversary leads the Ace, and, upon playing the same Suit, you play your Queen, which makes it almost certain to your Partner that you have the King ; and suppose your Partner refuses to that Suit, do not play the King, because if the Leader

er

er of that Suit, or his Partner have the Long Trump, you risk the losing of three Tricks to get one.

II.

Suppose your Partner has ten Cards remaining in his Hand, and that it appears to you, that they consist of Trumps and one Suit only; and suppose you should have King, Ten, and one small Card of his strong Suit, with Queen and two small Trumps; in this Case, you are to judge he has five Cards of each Suit, and therefore you ought to play out the King of his strong Suit; and if you win that Trick, your next best Play is, to throw out the Queen of Trumps; if that likewise comes home, proceed to play Trumps: This Method of Play may be made use of at any Score of the Game, except at 4 and 9.

III.

The TRUMP turned up to be remembered.

It is so necessary that the Trump turned up should be known and remembered, both by the Dealer and his Partner, that we think it proper to observe, That the Dealer should always so place that Card, as to be certain of having recourse to it: For, suppose it to be only a 5, and that the Dealer has two more, *viz.* the 6 and 9, if his Partner trumps out with Ace and King,

King, he ought to play his 6 and 9 ; because, let us suppose your Partner to have Ace, King, and four small Trumps, in this Case, by your Partner's knowing you have the 5 remaining, you may win many Tricks.

IV.

Your right-hand Adversary leads a Suit of which you have the Ten and two small ones ; the third Hand puts up the Knave, your Partner wins it with the King ; when your right-hand leads that Suit again, and plays a small one, do you put on your Ten, because it may save your Partner's Ace, upon Supposition that your right-hand Adversary led from the Queen ; you will seldom fail of Success by this Method of Play.

V.

Suppose you have the best Trump, and that the Adversary *A* has one Trump only remaining, and that it appears to you that your Adversary *B* has a great Suit ; in this Case, though you permit *A* to make his Trump, yet by keeping the Trump in your Hand, you prevent the Adversary *B* from making his great Suit ; whereas, if you had taken out *A*'s Trump, it had made only one Trick difference, but by this Method you probably save three or four Tricks.

VI.

The following CASE happens frequently.

That you have two Trumps remaining when your Adversaries have only one, and it appears to you that your Partner has one great Suit, in this Case always play a Trump, tho' you have the worst, because by removing the Trump out of your Adversary's Hands, there can be no Obstruction to your Partner's great Suit.

VII.

Suppose you should have three Trumps when no body else have any, and that you should have only four Cards of any certain Suit remaining; in this Case play a Trump, which shews your Partner that you have all the Trumps, and also gives you a fair Chance for one of your Adversaries to throw away one Card of the aforesaid Suit; by which means, supposing that Suit to have been once led, and one thrown away, makes Five, and four remaining in your Hand makes Nine, there being only four remaining between three Hands, and your Partner having an equal Wager to hold a better Card in that Suit than the last Player, it therefore follows that you have an equal Chance to make three Tricks in that Suit, which probably could not have been done but by this Method of Play.

Suppose

VIII.

Suppose you have five Trumps, and six small Cards of any Suit, and you are to lead; the best Play is to lead from the Suit of which you have six, because, as you are deficient in two Suits, your Adversaries will probably trump out, which is playing your own Game for you; whereas, had you begun with playing Trumps, they would force you, and consequently destroy your Game.

C H A P. XIV.

Some Purchasers of the TREATISE in Manuscript, disposed of the last Winter, having desired a further Explanation concerning the playing of Sequences, they are explained in the following Manner.

I.

IN Trumps you are to play the highest of your Sequences, unless you shou'd have Ace, King, and Queen; in that Case play the lowest, in order to let your Partner into the State of your Game.

II.

In Suits which are not Trumps, if you have a Sequence of King, Queen, and Knave, and two small ones; whether you
are

are strong in Trumps or not, it is the best Play to begin with the Knave, because, by getting the Ace out of any Hand, you make room for the whole Suit.

III.

And in case you are strong in Trumps, supposing you should have a Sequence of Queen, Knave, Ten, and two small Cards of any Suit; in that Case, you ought to play the highest of your Sequence, because, if either of the Adversaries should trump that Suit in the second Round, by being strong in Trumps, you fetch out their Trumps, and consequently make the Remainder of that Suit.

The like Method may be taken, if you should happen to have a Sequence by Knave, Ten, Nine, and two small Cards of any Suit.

IV.

If you have a Sequence of a King, Queen, Knave, and one small Card of any Suit, whether you are strong in Trumps, or otherwise, play your King; and do the like by any inferior Sequences, if you have only four in Number.

V.

But if you should happen to be weak in Trumps, you must always begin with the lowest of the Sequence, in case you should have five in Number; for suppose

D

your

your Partner to have the Ace of that Suit, he then makes it; and where lies the Difference whether you or your Partner win a Trick? For if you had the Ace and four small Cards of any Suit, and are weak in Trumps, and led from that Suit, if you play well, you ought to play the Ace; if you are very strong in Trumps, you may play your Game as backward as you please; but if you are weak in Trumps, you must play the reverse.

VI.

Let us explain what is meant by being strong or weak in Trumps.

If you have Ace, King, and three small Trumps.

King, Queen, and three small Trumps.

Queen, Knave, and three small Trumps.

Queen, Ten, and three small Trumps.

Knave, Ten, and three small Trumps.

Queen, and four small Trumps.

Knave, and four small Trumps.

In any of the aforesaid Cases, you may be understood to be very strong in Trumps, and therefore you may play by the foregoing Rules, being morally assured of having the Command in Trumps.

If you have two or three small Trumps only; we understand you to be weak in them.

VII

VII.

What Strength in Trumps intitles you to force your Partner at any Point of the Game?

Ace, and three small Trumps.

King, and three small Trumps.

Queen, and three small Trumps.

Knave, and three small Trumps.

VIII.

If, by Accident, either you or the Adversaries have forced your Partner, (tho' you are weak in Trumps) if he has had the Lead, and does not chuse to trump out, force him on as often as the lead comes into your Hand, unless you have good Suits of your own to play.

IX.

If you should happen to have only two or three small Trumps, and that your right-hand Adversary leads a Suit of which you have none, trump it, which is an information to your Partner that you are weak in Trumps.

X.

Suppose you have Ace, Knave, and one small Trump, and that your Partner trumps to you, suppose from the King and three small Trumps, *Query*, Whether it is the best Play to put on the Ace or Knave? And suppose your right-hand Adversary has three Trumps, and that your left-hand Ad-

versary has the like Number ; in this Case, by finessing of your Knave, and playing your Ace, if the Queen is on your right-hand, you win a Trick by it ; but if the Queen is on your left-hand, and you shou'd play the Ace, and then return the Knave, admitting your left-hand Adversary put on the Queen, which he ought to do, it is above 2 to 1 that one of the Adversaries have the Ten, and consequently you gain no Trick by playing thus.

XI.

If your Partner has led from the Ace of Trumps, and suppose you shou'd have King, Knave, and one small Trump, by putting on your Knave, and returning the King, it answers exactly thelike Purpose of the former Rule.

In other Suits you may practice the like Method.

XII.

If you are strong in Trumps, and that you have King, Queen, and two or three small Cards in any other Suit, you may lead a small one, it being 5 to 4 that your Partner has an Honour in that Suit ; but, if you are weak in Trumps, you ought to begin with the King.

XIII.

If your right-hand Adversary leads a Suit of which you have King, Queen, and
two

two or three small Cards of the same Suit, you being strong in Trumps, may pass it, because it is an equal Wager that your Partner has a better Card in that Suit than the third Hand ; if not, by your Strength of Trumps, you need not fear making that Suit.

XIV.

If your right-hand Adversary leads a Suit, of which you have King, Queen, and one small Card, whether in Trumps or not, put on the Queen: Also, if you have Queen, Knave, and one small Card, put on the Knave ; and if you have Knave, Ten, and one small Card, put on the Ten ; by putting up the second best, as aforesaid, your Partner has an Expectation of your having a better Card or Cards, in the same Suit ; and, by recourse to the Calculations annexed to this Treatise, he may be able to judge what are the odds for and against him.

XV.

If you shou'd have Ace, King, and two small Cards in any Suit, being strong in Trumps ; if your right-hand Adversary leads that Suit, you may pass it, because it is an equal Wager that your Partner has a better Card in that Suit than the third Hand ; if so, you gain a Trick by it ; if otherwise, you need not fear to make your

Ace and King, by your Strength in Trumps.

XVI.

If you should have the Ace, Nine, Eight, and one small Trump, and that your Partner leads the Ten; in that Case pass it, because unless the three Honours lie behind you, you are sure of making two Tricks; do the like, if you should have the King, Nine, Eight, and one small Trump; or the Queen, Nine, Eight, and one small Trump.

XVII.

In order to deceive your Adversaries, if your right-hand Adversary leads from a Suit, of which you have Ace, King, and Queen, or Ace, King, and Knave, put on the Ace; because that encourages the Adversaries to play that Suit again: And tho' you deceive your Partner by this Method of Play, you also deceive your Adversaries, which is of greater Consequence in this Case; because, if you had put on the lowest of the Tierce-major, or the Knave in the other Suit, your right-hand Adversary had made a Discovery that the Strength of that Suit was against him, and consequently would have changed Suits.

XVIII.

Suppose you have Ace, Ten, and one small Card, in any Suit; also the Ace, Nine, and one small Card of any Suit, *Query,*
Which

Which of these Suits ought you to lead from? *Answer*, from the Suit of which you have the Ace, Nine and one small Card; for this Reason, it being an equal Wager that your Partner has a better Card in that Suit, than the last Player; if not, let us then suppose that your right-Hand Adversary leads from the King, or Queen of the Suit, of which you have the Ace, Ten, and one small Card; in that Case, it is an equal Wager that your Partner has a better Card in that Suit, than the third Hand; if that happens to be the Case, upon the Return of the Suit, you lie Tenace, and consequently stand a fair Chance for three Tricks in that Suit.

XIX.

A CASE to demonstrate the Tenace.

Let us suppose *A* and *B* to play at Two-handed Whist, and let us suppose *A* to have the Ace, Queen, Ten, Eight, Six, and Four of Clubs, which in case *B* always leads, are six sure Tricks. Let us suppose he has the same Hand in Spades, which, in case *B* always leads, are six more sure Tricks. We suppose *B* has the Remainder of these two Suits.

Let us suppose *B* to have the same Hand in Hearts and Diamonds, as *A* has in Spades and Clubs, and that *A* has the Remainder of the Hearts and Diamonds, which, in case

A always leads, are twelve sure Tricks also to *B*.

The foregoing Case shews that both Hands are exactly equal; and therefore let one of them name his Trumps, and lead, he wins thirteen Tricks only.

But if one names the Trumps, and the other leads, he that names the Trumps ought to win fourteen Tricks.

Those who would attain to the playing of Whist to perfection, must not be content only with being a Master of the Calculations contained in this Treatise, and also an exact Judge of all the General and Particular Cases in the same: but be a very punctual Observer of such Cards as are thrown away, both by his Partner and Adversaries, and at what time: Whoever attends closely to these Particulars, is the most likely to attain their End.

CHAP. XV.

Additional CASES.

I.

WHEN it appears to you that the Adversaries have three or four Trumps remaining, and that neither you nor your Partner have any, never attempt to force one Hand to trump, and to let the other throw

throw away a losing Card, but rather endeavour to find out a Suit in your Partner's Hand, in case you have no Suit in your own, by which means you prevent them from making their Trumps separate.

II.

Suppose *A* and *B* are Partners against *C* and *D*, and suppose nine Cards are played out, and also suppose eight Trumps are played out ; and further suppose *A* to have one Trump only, and suppose his Partner *B* to have the Ace and Queen of Trumps, and suppose the Adversaries *C* and *D* to have the King and Knave of Trumps between them, *A* leads his small Trump, *C* plays the Knave of Trumps; *Query*, Whether *B* is to play his Ace or Queen of Trumps upon the Knave? *Answer*, *B* is to play his Ace upon the Knave, because *D* having four Cards in his Hand remaining, and *C* has only three, consequently, it is four to three in *B*'s Favour that the King is in *D*'s Hand ; if we reduce the Number of four Cards in a Hand to three, the Odds then is 3 to 2 ; and if we reduce the Number of three Cards in a Hand to two, the Odds then is 2 to one in favour of *B*'s winning of a Trick, by putting on his Ace of Trumps : By the like Rule you may play all the other Suits.

III.

Let us suppose you have the thirteenth Trump, and also the thirteenth Card of any Suit in your Hand, and one losing Card, and let us suppose you have only three Cards remaining; *Query*, Which of these Cards are you to play? *Answer*, You are to play the losing Card, because if you play the thirteenth Card first, the Adversaries knowing you to have one Trump remaining, will not pass your losing Card, and therefore you play 2 to 1 against yourself.

IV.

Let us suppose that you have the Ace, King, and three small Cards in any Suit, which has never been played, and let us suppose that it appears to you that your Partner has the last Trump remaining, *Query*, How are you to play these Cards to your greatest Advantage? *Answer*, You are to lead a small Card in that Suit, because it is an equal Wager that your Partner has a better Card in that Suit than the last Player; if so, and that there are only three Cards in that Suit in any one Hand, it follows that you win five Tricks in that Suit; whereas, if you play the Ace and King of that Suit, it is 2 to 1 that your Partner does not hold the Queen, and consequently, by playing the Ace and King, it is 2 to 1 that you win only two Tricks in that Suit. This Method
may

may be taken in case all the Trumps are played out, provided you have good Cards in other Suits to bring in this Suit, and you may observe that you reduce the Odds of 2 to 1 against you, to an equal Chance by this Method of Play, and probably gain three Tricks by it.

V.

If you choose to have Trumps played by the Adversaries, and that your Partner has led a Suit to you, of which you have the Ace, Knave, Ten, Nine, and Eight, or the King, Knave, Ten, Nine, and Eight, you are to play the Eight of either Suit, which probably leads the Adversary, if he wins that Card, to play Trumps.

VI.

Suppose you should have a Quart-major in any Suit, with one or two more of the same Suit, and that it is necessary to let your Partner know that you have the Command of that Suit, in that Case, throw away the Ace of that Suit, upon any Suit of which you have none in your Hand to clear up his Doubts, because the Odds is in your favour that neither of the Adversaries have more than three in that Suit: The like Method may be taken if you have a Quart to a King; (the Ace being played out) you may throw away the King, also if you should have a Quart to a Queen, (the Ace and King being played out) you may throw
D 6
away

away your Queen: All which lets your Partner into the State of your Game, and you may play by the like Rule in all inferior Sequences, having the best of them in your Hand.

VII.

There is scarcely any thing more commonly practised amongst moderate Players, in case the King is turned up on their left-hand, and that they have the Queen and one small Trump only, to play out their Queen, in hopes their Partner may win the King if it is put on; not considering that it is about 2 to 1 that their Partner has not the Ace, and admitting he has the Ace, they do not consider that they play two Honours against one, and consequently weaken their Game, the Necessity only of playing Trumps should oblige them to play thus.

VIII.

A Case which frequently happens.

A and *B* are Partners against *C* and *D*; all the Trumps are played out except one which *C* or *D* has; *A* has three or four winning Cards in his Hand of a Suit already played, with an Ace and one small Card of another Suit; *Query*, Whether it is *A*'s best Play to throw away one of his winning Cards, or the small Card to his Ace-suit? *Answer*, It is his best Play to throw away one.

one of his winning Cards, because if his right-hand Adversary plays to his Ace-suit, he has it in his Power to pass it, and consequently his Partner *B* has an equal Chance to have a better Card in that Suit than the third Hand ; if so, and that he has any forcing Card, or one of his Partner's Suit to play to him, in order to force out the last Trump, his Ace remaining in his Hand, brings in his winning Cards ; whereas, if *A* had thrown away the small Card to his Ace-suit, and that his right-hand Adversary had led that Suit, he had been obliged to put on his Ace, and consequently had lost some Tricks by this Method of Play.

IX.

Suppose ten Cards have been played out, and suppose it appears very probable that your left-hand Adversary has three Trumps remaining, *viz.* the best and two small ones ; and suppose you have two Trumps only, and that your Partner has no Trump, and suppose your right-hand Adversary plays a Thirteenth or some other winning Card ; in that Case pass it, by which Means you gain a Trick.

X.

In order to let your Partner into the State of your Game, let us suppose you to have a Quart-major in Trumps (or any other four best Trumps) if you are obliged to
trump,

trump a Card, win it with the Ace of Trumps, and then play the Knave, or win it with the highest of any other four best Trumps, and then play the lowest, which clears up your Game to your Partner, and by such a Discovery it may be the Means of winning many Tricks; you may practice the like Rule in all other Suits.

XI.

If your Partner calls at the Point of Eight before his time, you are to trump to him, whether you are strong in Trumps or Suits, or not, because as he calls before he is obliged to do so, it is a Declaration of his being strong in Trumps.

XII.

Suppose your right-hand Adversary turns up the Queen of Clubs, and suppose when he has the lead, he plays the Knave of Clubs, and suppose you have the Ace, Ten, and one Club more, or the King, Ten, and one small Card. *Query*, When he leads his Knave whether you are to win it or not? *Answer*, You are not to win it, because it is an equal Wager, when he leads his Knave of Clubs, you not having the King, that your Partner has it; also, it is an equal Wager when he leads his Knave of Clubs, you not having the Ace, that your Partner has it, and consequently you gain a Trick by passing it; which cannot be done if you either put on your King or Ace of Clubs.

XIII.

XIII.

A Case for a Slam.

Let us suppose *A* and *B* Partners against *C* and *D*, and let us suppose *C* to deal, and let us suppose *A* to have the King, Knave, Nine, and seven of Clubs, they being Trumps; a Quart-major in Diamonds, a Terce-major in Hearts, and the Ace and King of Spades.

Let us suppose *B* to have nine Diamonds, two Spades, and two Hearts.

Also let us suppose *D* to have the Ace, Queen, Ten and Eight of Trumps, with nine Spades.

And let *C* have five Trumps and Eight Hearts.

A is to lead a Trump, which *D* is to win, and *D* is to play a Spade which his Partner *C* is to trump; *C* is to lead a Trump, which his Partner *D* is to win; then *D* is to lead a Spade, which *C* is to trump; and *C* is to play a Trump, which *D* is to win; and *D* having the best Trump is to play it; which done, *D* having seven Spades in his Hand wins them, and consequently Slams *A* and *B*.

C H A P. XVI.

Additional CASES at WHIST, never published till 1748.

I.

IF your Partner leads the King of a Suit, and that you have none of that Suit, pass it, by throwing away a losing Card, (unless your right-hand Adversary has put on the Ace, because, by so doing you make room for his Suit.

II.

Suppose your Partner leads the Queen of a Suit, and your right-hand Adversary wins it with the Ace, and returns that Suit, in case you have none of it, do not trump it, but throw away a losing Card, which makes room for your Partner's Suit. An Exception to this Manner of Play is, if you play for an odd Trick, and that you are very weak in Trumps, you may trump it.

III.

Suppose you have the Ace, King, and a small Card of a Suit, and that your left-hand Adversary leads that Suit; and suppose you should have 4 small Trumps, and no Suit of consequence to lead from; and suppose your right-hand Adversary should put up the Nine, or any lower Card;

Card; in this Case, win it with the Ace, and return the lead upon the Adversary, by playing the small Card of that Suit; who will have reason to judge that the King lies behind him, and consequently will not put up his Queen if he has it, and therefore you have a fair Probability of winning a Trick by this Method of Play, and at the same time letting your Partner into the State of your Game.

IV.

If your Partner forces you to trump a Card early in the Deal, you are to suppose him strong in Trumps; except at the points of 4 or 9, and therefore if you are strong in Trumps you may play them.

V.

Suppose you call at the Point of 8, and your Partner has no Honour, and suppose you should have the King, Queen, and Ten; the King, Knave, and Ten; or the Queen, Knave, and Ten of Trumps; when Trumps are played always put on the Ten, which demonstrates to your Partner that you have 2 Honours remaining, and so plays his Game accordingly.

VI.

Suppose your right-hand Adversary calls at the Point of 8, and his Partner has no Honour, and suppose you should have the King, Nine, and 1 small Trump, or the Queen, Nine, and 2 small Trumps, when
Trumps

Trumps are played by your Partner put on the Nine, because it is about 2 to 1 that the Ten is not behind you, and so you play your Nine to an Advantage.

VII.

If you should happen to lead a Suit of which you have the Ace, King, and 2, or 3 more, when you play the Ace, if your Partner plays the Ten, or Knave, and suppose you should have one single Card in your Hand in any other Suit, and two or three small Trumps only, in this Case lead the single Card in order to establish a Saw, and this Consequence attends such Play, *viz.* upon leading that Suit it gives your Partner an equal Chance of having a better Card in it than the last Player, whereas had he led that Suit to you, which is probable had been his strong Suit, the Adversary would have made the Discovery of your attempting to establish a Saw, they would trump out, and so prevent your making your small Trumps: By this Method of Play your Partner will easily judge the Reason for your changing of Suits; and so play his Game accordingly.

VIII.

Suppose you have the Ace and Deuce of Trumps, and strong in the three other Suits, if you are to lead, play your Ace, and next your Deuce of Trumps, in order
to

to put the Lead into your Partner's Hands, to take out 2 Trumps for 1 ; and suppose the last Player wins that Trick, and that he leads a Suit of which you have the Ace, King, and 2 or 3 more, pass it, because it is an equal Wager that your Partner has a better Card in that Suit than the third Hand ; if so, he will then have an Opportunity of taking out two Trumps to one ; when the Lead comes into your Hand you are to endeavour to force out 1 of the 2 Trumps remaining, upon Supposition 1 Trump is played out, and the Odds is still in your Favour that your Partner has 1 of the 2 Trumps remaining.

IX.

Suppose 10 Cards are played out, and that you have the King, Ten, and 1 small Card of any Suit, which has never been led, and suppose you have won 6 Tricks, and suppose your Partner leads from that Suit, and that there is neither a Trump or thirteenth Card in any Hand, in this Case, unless your right-hand Adversary puts on so high a Card as obliges you to play your King, do not put it on, because upon the Return of that Suit you make your King, and consequently the odd Trick, which makes 2 difference, if there happens to be only 9 Cards played out in the like Circumstance, you are to play by the like Rule

Rule. This Method is always to be taken unless the gaining of 2 Tricks gives you a Chance either to save your Lurch or to win or save the Game.

X.

Suppose *A* and *B* Partners against *C* and *D*, and let us suppose *B* has the two last Trumps, also the Queen, Knave, and Nine, of another Suit, and let us suppose *A* has neither the Ace, King, or Ten, of that Suit, and *A* is to lead that Suit; *Query*, What Card is *B* to play to give him the fairest Probability of winning a Trick in that Suit? *Answer*, *B* is to play the Nine of that Suit; because it is only five to four against him that his left-hand Adversary holds the Ten, and if he plays either the Queen, or Knave, it is about three to one that the Ace, or King, is in his left-hand Adversary's Hands, and consequently he reduces the Odds of three to one against him, to five to four only.

XI.

Let us vary the foregoing Case, and put the King, Knave, and Nine of a Suit into *B*'s Hand, upon Supposition that *A* has neither Ace, Queen, or Ten, when *A* leads that Suit, it is exactly equal whether *B* plays his King, Queen, or Ten.

XII.

Suppose you have Ace, King, and three
or

four small Cards of a Suit not played, and that it appears to you that your Partner has the last Trump; in this Case, if you are to lead, play a small Card in that Suit, it being an equal Wager that your Partner has a better Card in that Suit than the last Player; if so, the Probability is in your Favour that you make 5 or 6 Tricks in that Suit, but if you should play out the Ace and King, of that Suit, it is 2 to 1 that your Partner has not the Queen, and consequently it is 2 to 1 that you make only two Tricks in that Suit, by which Method of Play you risk the losing of 3 or 4 Tricks in that Deal to gain one only.

XIII.

Suppose your Partner leads a Suit of which he has the Ace, Queen, Knave, and many more, and leads his Ace, and then plays his Queen, in case you have the King and two small Cards in that Suit, win his Queen, with the King, and suppose you are strong in Trumps, by clearing the Board of Trumps, and having a small Card of your Partner's great Suit, you do not obstruct his Suit, and consequently win many Tricks by this Method of Play.

CHAP. XVII.

A DICTIONARY for WHIST, which resolves almost all the Critical Cases that may happen at that GAME, by way of Question and Answer.

1. **H**OW to play Trumps to the great est Advantage, peruse the Treatise of Whist, Chap. I. Case 11. and all the remaining Cases in that Chapter, also Chap. II.

2. How to play Sequences when Trumps?
Answer, you are to begin with the highest of them.

3. How to play Sequences when they are not Trumps?

Ans. If you have 5 in Number, you are to begin with the lowest, if 3 or 4 in Number, always play the highest.

4. Why do you prefer playing of Sequences rather than other Suits?

Ans. Because they are the safest Lead, and gain the Tenace in other Suits.

5. When ought you to make Tricks early?

Ans. When you are weak in Trumps.

6. When ought you not to make Tricks early?

Ans. When you are strong in Trumps.

7. When do you play from an Ace-suit?

Ans. You do so when you have 3 in Number only in any Suit (Trumps excepted.)

8. When don't you play from an Ace Suit?

Ans. You ought not to lead from an Ace-suit, having 4 or more in Number in any other Suit; because the Ace is an Assistant to your great Suit, and when Trumps are played out enables you to make that Suit.

9. When any Card of Consequence is turned up on your right or left-hand, How are you to play in that Case? See Chap. X. Case 1. Chap. XII. Case 1.

10. Why are you always to play your Hand by your own and Adversaries Scores?

Ans. Chap. I. Case 6. See References in this Case.

11. How to know when your Partner has no more of the Suit played? See Chap. IV. Case 1, 2, 3.

12. Reasons for putting on at Second-hand the King, Queen, Knave, Ten, and when not? Chap. X. Case 1 & 2, 3.

13. Why are you to play the Queen, Knave, Ten, of any Suit, when that Suit is played a second time, having 3 in Number only? Chap. XIII. Case 4.

14. When ought you to over-trump your Adversary, and when not?

Ans.

Ans. When you are weak in Trumps, you ought to over-trump him ; but if strong in Trumps, you ought to throw away a losing Card.

15. Reasons for not parting with the Command of your Adversary's strong Suit, Chap. XIII. Case 1.

16. If your Adversary on your right hand leads a Suit of which you have the Ace, King, and Queen, Why are you to put on the Ace preferable to the Queen ?

Ans. Because it deceives the Adversary ; which, in this Case, is of more Consequence to you than to deceive your Partner.

17. To declare your strong Suit, when proper to be done, and when not ?

Ans. When you have only one strong Suit, and your Trump out to make that Suit, in this Case you ought to declare it ; but if you are strong in all Suits, there is no Necessity of declaring your strongest Suit.

18. The Ace turned up on your right-hand, and that you have the Ten and Nine only of Trumps, Why do you play the Ten ? Chap. XI. Case 1.

19. Why do you play from a King-Suit preferable to a Queen-Suit, having the like Number of each ?

Ans. Because it is 2 to 1 that the Ace does not lye in your left hand Adversary's Hand,

Hands, and it is 5 to 4 if you lead from a Queen-suit, that the Ace or King lyes in his Hands, and that you lose your Queen, and so play to a Disadvantage.

20. Why do you play from a Queen-suit preferable to a Knave-suit? Answer'd Case 19.

21. When you have the 4 best Cards of any Suit, Why do you throw away the best?

Ans. To let your Partner into the State of your Game.

22. Your Partner's strong Suit, How are you to make the most of it?

Chap. VI. has six Examples to demonstrate it.

23. The Queen turn'd up on your right Hand, you have the Ace, Ten, and one Trump, or the King, Ten, and one Trump, if the right-hand Adversary plays the Knave, *Query*, How are you to play?

Ans. You are to pass it, by which you have an equal Wager of gaining a Trick, and cannot lose by so doing.

24. Four Cards are played out, and Trumps are gone round twice, your Partner not appearing to have an higher Trump than the 8, yet he has 3 Trumps, when he plays his third Trump, the next Hand puts on the Knave, there being the King only

in the Adversary's Hands, you having the Ace and Queen of Trumps.

Query, Whether are you to play the Ace or Queen ?

Ans. You are to play the Ace, because it is 9 to 8 that the last Player has the King; and if you reduce the Cards to 2 in Number, it then is 2 to 1 in your favour, by playing the Ace, that the King falls; the like Method may be taken in other Suits, upon the like Occasions.

E X A M P L E.

Let us suppose that you have only 2 Cards remaining in your Hands of any Suit, *viz.* The Queen and Ten, and let us suppose the Knave and Nine of the same Suit are in your Adversary's Hands, when your Partner leads that Suit, your right-hand Adversary plays the Nine, and has 1 Card only remaining.

Query, Whether you ought to play your Queen or Ten ?

Ans You ought to play your Queen, because it is 2 to 1 that your left-hand Adversary has the Knave. And in all Cases of the like Nature you ought to play by this Rule.

I would know what is the Odds that the Dealer at Whist holds four Trumps or more ?

Ans.

Ans. That he holds 4 Trumps or more is 232 to 165, or about a Guinea to 14s. 11d. and almost a Farthing.

C H A P. XVIII.

*An Explanation for the Use of Beginners,
of some of the TERMS, or TECHNICAL
WORDS made use of in this Treatise.*

F I N E S S I N G.

M E A N S the endeavouring to gain an Advantage by Art and Skill, which consists in this ; when a Card is led and you have best and third best Card of that Suit, you judge it best to put your third best Card upon that Lead and run the Risk of your Adversary's having the second best of it, that if he has it not, which is 2 to 1 against him, you are then sure of gaining a Trick.

F O R C I N G.

Means the obliging your Partner or your Adversary to trump a Suit of which he has none. The Cases mentioned in this Treatise will shew when it is proper to force either of them.

L O N G T R U M P.

Means the having one or more Trumps in your Hand when all the rest are out.

A Short TREATISE on L O O S E C A R D.

Means a Card in a Hand that is of no Value, and consequently the properest to throw away.

P O I N T ' S.

Ten of them make a Game, as many as are gained by Tricks or Honours, so many Points are set up to the Score of the Game.

Q U A R T.

In general is a Sequence of any four Cards immediately following one another in the same Suit. *Quart-major* is therefore a Sequence of Ace, King, Queen, and Knave, in any Suit.

Q U I N T.

In general is a Sequence of any five Cards immediately following one another, in the same Suit. *Quint-major* is therefore a Sequence of Ace, King, Queen, Knave, and Ten, in any Suit.

R E V E R S E.

Playing at any time the *Reverse*, means only the playing your Hand in a different manner; that is to say, if you are strong in Trumps you play one way, but if weak in Trumps you play the *Reverse*, viz. another.

S E E - S A W.

Is when each Partner trumps a Suit, and they

they play those Suits to one another to trump.

S C O R E.

Score of the Game, is the Number of Points set up, Ten of which makes a Game.

T E N A C E.

Having the Tenace in any Suit supposes the having the first and third best Cards, and being the last Player, and consequently you catch the Adversary when that Suit is play'd: As for instance, in case you have the Ace and Queen of any Suit, and that your Adversary leads that Suit, you must win those two Tricks ; and so of any other Tenace in inferior Cards.

T E R C E.

In general is a Sequence of any three Cards immediately following one another in the same Suit.

Terce-major is therefore a Sequence of Ace, King, and Queen, in any Suit.

C H A P. - XIX.

An ARTIFICIAL MEMORY, or an easy Method of assisting the MEMORY of those that play at the Game of WHIST.

To which are added,
Several CASES not hitherto published.

I.

PLACE of every Suit in your Hand, the worst of it to the left hand and the best (in Order) to the right, and the Trumps in the like Order, always to the left of all the other Suits.

II.

If in the Course of Play you find you have the best Card remaining of any Suit, put the same to the left of your Trumps.

III.

And if you find you have the second best Card of any Suit to remember, place it on the right of your Trumps.

IV.

And if you have the third best Card of any Suit to remember, place a small Card of that Suit between the Trumps and that third best, to the right of the Trumps.

V.

To remember your Partner's first Lead, place a small Card of that Suit led in the
miest

midst of your Trumps, and if you have but one Trump, on the left of it.

VI.

When you deal, put the Trump turned up to the right of all your Trumps, and part with it as late as you can, that your Partner may know you have that Trump left, and so play accordingly.

VII.

To find where, or in what Suit your Adversaries revoke.

Suppose the two Suits on your right-hand to represent your Adversaries in the Order they sit, as to your right and left-hand :

When you suspect either of them to have made a Revoke in any Suit, clap a small Card of that Suit amongst the Cards representing that Adversary, by which means you record not only that there may have been a Revoke, but also which of them made it, and in what Suit.

If the Suit that represents the Adversary that made the Revoke, happens to be the Suit he revoked in, change that Suit for another, and as above, put a small Card of the Suit revoked in, in the middle of that exchanged Suit, and if you have not a Card of that Suit, reverse a Card of any Suit you have (except Diamonds) and place it there.

VIII.

As you have a way to remember your Partner's first Lead, you may also record in what Suit either of your Adversaries made their first Lead, by putting the Suit in which they made that Lead, in the Place which in your Hand represents that Adversary, as either of your right or left-hand; and if other Suits were already placed to represent them, then exchange them for the Suits in which each of them makes his first Lead.

The foregoing Method is to be taken when you find it more necessary to record the Adversary's first Lead, than to endeavour to find out a Revoke.

CHAP. XX.

The Laws of the Game at WHIST.

1. **I**F any Person plays out of his Turn, it is in the Option of either of his Adversaries to call the Card so played, at any time in that Deal, provided it does not make him revoke; or if either of the adverse Party is to lead, he may desire his Partner to name the Suit he chuses to have him lead, and when a Suit is then named, the Partner must play it if he has it.

2. No Revoke to be claim'd till the Trick is turned and quited, or the Party who re-
voked

voked, or his Partner, have played again.

3. If a Revoke happens to be made, the adverse Party may add 3 to his Score, and the revoking Party, provided they are up, notwithstanding the Penalty, must remain at 9 : The Revoke takes place of any other Score of the Game.

4. If any Person calls at any Point of the Game, except 8, either of the adverse Parties may call a new Deal ; and they are at liberty to consult each other whether they will have a new Deal.

5. After the Trump Card is seen, no Body ought to remind his Partner to call.

6. If the Trump-Card is seen, no Honours in the preceeding Deal can be set up, unless they were before claimed.

7. If any Person separates a Card from the rest, either of the adverse Parties may call it, provided he names it, and proves the Separation ; but in case he calls a wrong Card, either of the adverse Parties may once call the highest or lowest Card in any Suit led during that Deal.

8. Each Person ought to lay his Card before him ; after he has done so, if either of the adverse Parties mix their Card with his, his Partner is intituled to demand each Person to lay his Card before him ; but not to enquire who played any particular Card.

9. If any Person revokes, and before the
Cards

Cards are returned, discovers it, the adverse Party may call either the highest or the lowest Card of the Suit led, or have their Option to call the Card then played at any other time, when it does not cause a Revoke.

10. If a Card in dealing is turned up, it is in the Option of the adverse Party to call a new Deal, unless they or either of them, have been the Cause of turning up such Card, in which Case the Dealer has the Option.

11. If the Ace or any other Card of any Suit is led, and it should so happen that the last Player plays out of his Turn, whether his Partner has any of the Suit led or not (provided you do not make him revoke) he is neither intitled to trump it, nor to win that Trick.

12. If a Card is faced in the Pack, they must deal again, except it is the last Card.

13. None of the Players are to take up, or look at their Cards, while any Person is dealing, and if the Dealer should happen to miss Deal, in that Case he shall deal again, and if a Card is turned up in dealing, no new Deal is to be called.

14. When a Card is led, if one of the Adversaries plays out of his Turn, his Partner is not to win the Trick, if he can avoid it without revoking.

15 Every Person ought to see that he has 13 Cards dealt him; therefore, if any one

one should happen to have only 12 Cards, and does not find it out till several Tricks are played, and that the rest of the Players have their right Numbers, the Deal stands good; and also the Person who plays with 12 Cards, is to be punished with each Revoke in case he has made any; but if any of the rest of the Players should happen to have 14 Cards, in that Case the Deal is void.

16. If any Person throws his Cards upon the Table, with their Faces upwards, upon Supposition that he has lost the Game, if his Partner does not give up the Game, the Adversaries have it in their power to call any of those Cards, when they think proper, provided they do not make the Party revoke.

17 *A* and *B* are Partners against *C* and *D*. *A* leads a Club, his Partner *B* plays before the Adversary *C*; in this Case *D* has a right to play before his Partner *C*, because *B* played out of his Turn.

18. If any Person is sure of winning every Trick in his Hand, he may shew his Cards upon the Table, but should it so happen that he has any losing Card in his Hand, he is then liable to have all his Cards called.

19. No Person ought to ask his Partner whether he had played an Honour, while the Cards are playing.

20. *A* and *B* are Partners against *C* and *D*. *A* leads a Club, *C* plays a Spade, *B* plays the
King

King of Clubs, and *D* plays a Club, *C* discovers he has revoked before the Trick is turn'd.

Query, What is the Penalty?

B may take up his Card again, and so may *D*, and either *A* or *B* have it in their Option to oblige *C* to play the highest or lowest Card of the Suit led.

21. If any Person calls at the Point of 8, and his Partner answers, and both the opposite Parties have thrown up their Cards, and it appears that the other Side had not two by Honours, in this Case, they may consult with one another about it, and are at Liberty to stand the Deal or not.

22. And if any body answers, when he has not an Honour, the adverse Party may consult with one another about it, and are at liberty to stand the Deal or not.

23. No Person may take new Cards in the Middle of a Game, without the Consent of all Parties.

24. The Dealer ought to leave to view upon the Table his trump Card, till it is his Turn to play, and after he has mixed it with his other Cards, nobody is entituled to demand what Card is turned up, but may ask what is Trumps; this Consequence attends such a Law, that the Dealer cannot name a wrong Card, which he otherwise might have done.

End of the GAME of WHIST.

A SHORT
TREATISE

On the GAME of

QUADRILLE.

SHEWING

The Odds of winning or losing most
Games that are commonly played;
either by calling a King, or by playing
Sans Prendre,

To which are added,

The LAWS of the GAME.

THE SECOND EDITION.

A Treatise on the GAME of
QUADRILLE.

CHAP. I.

BECAUSE a Learner may be at a loss to know the Rank or Order of the Cards, when Trumps or not, the two following Tables shew them.

The Rank or Order of the Cards when not Trumps.

Clubs and Spades.	Hearts and Diamonds.
King,	King,
Queen,	Queen,
Knave,	Knave,
Seven,	Ace,
Six,	Duce,
Five,	Three,
Four,	Four,
Three,	Five,
Duce,	Six,
—	Seven,
In all 9.	—
	In all 10.

4 *A short Treatise on the
The Rank or Order of the Cards when
Trumps.*

Clubs and Spades.	Hearts and Diamonds.
Spadille, <i>the Ace of Spades,</i>	Spadille, <i>the Ace of Spades,</i>
Manille, <i>the Duce of Spades or of Clubs,</i>	Manille, <i>the Seven of Hearts or of Diamonds,</i>
Basto, <i>the Ace of Clubs.</i>	Basto, <i>the Ace of Clubs,</i>
	Punto, <i>the Ace of Hearts or of Dia- monds.</i>
King,	King,
Queen,	Queen,
Knave,	Knave,
Seven,	Duce,
Six,	Three,
Five,	Four,
Four,	Five,
Three,	Six,
<hr/>	<hr/>
In all 11,	In all 12.

You may observe by the foregoing Tables, that Spadille and Basto are always Trumps, therefore the red Suits have one Trump more than the Black.

There are three Matadores, *viz.* Spadille, Manille, and Basto.

Therefore,

Game of QUADRILLE. 5

Therefore, if an ordinary Trump is led, you are not obliged to play a Matadore upon it; but if Spadille is led, and you should Manille or Basto unguarded, you must play it; also if Manille is led, and you should have Basto unguarded, it must be played.

The Order of the false Matadores.

Clubs and Spades.	Hearts and Diamonds.
Manille, <i>the Duce</i> of Clubs or of Spades.	Manille, <i>the Seven</i> of Hearts or of Diamonds.
Basto, <i>the Ace</i> of Clubs,	Basto, <i>the Ace</i> of Clubs,
	Punto, <i>the Ace</i> of Hearts or Dia- monds.
King,	King,
Queen,	Queen,
Knave,	Knave,
Seven,	Duce,
Six	Three,
Five,	Four,
Four,	Five,
Three,	Six,
<hr/>	<hr/>
In all 10,	In all 11.

You see by the foregoing Table the Order or Rank of the false Matadores.

We generally call them false Matadores, if we begin at Basto and so proceed by Sequences to any Number.

C H A P. II.

I.

TH E first thing to be done, after you have seen your Cards, is, to ask Leave to pass, or play, *sans prendre*; and if you name a wrong Trump, you must abide by it.

II.

If all the Players pass, he who has Spadille is obliged to play, but if he does not make three Tricks, he is not beasted,

III.

The Player ought to have a fair Probability of winning three Tricks when he calls a King to prevent his being beasted.

IV.

Therefore we will set down such Games only, as give a fair Chance to win the Game by calling a King, with Directions at the End of each Case what Trump you are to lead.

Game of QUADRILLE. 7

Calculations necessary to be understood by those who have made some Progress in the Game.

I.

I would know what is the Odds that my Partner holds one Card out of any two certain Cards?

Answer, That he hold one Card out of any two certain Cards is about 5 to 4 in his favour.

II.

I would also know what is the Odds that my Partner holds one Card out of any three certain Cards?

Answer, That he holds one Card out of any three certain Cards is about 5 to 2 in his favour.

An Explanation and Application of the foregoing Calculations.

I. •

That your Partner holds one Card out of any two certain Cards.

Suppose you should hold one Matadore, it is by this Calculation evident, that it is 5 to 4 in your favour that your Partner holds one of the other two, and consequently you may play your Game accordingly.

Again, suppose you call a King, and having a Knave and one small Card of a Suit in your Hand; by the foregoing Cal-

A 4

culatation,

8 *A short Treatise on the*

culatation, it is plain that you have 5 to 4 in your favour, that your Partner holds either the King or Queen of that Suit, and consequently you have the Odds in your favour to win a Trick in that Suit.

II.

That your Partner holds one Card out of any three certain Cards.

Suppose you have no Matadore, but with the Assistance of one of them you have great Odds of winning the Game; you may observe, by the foregoing Calculation, that it is about 5 to 2 that your Partner holds one of them, you having none.

This Calculation may be applied to many other Cases, very useful to the Player.

Games in Red, which may be played, calling a King.

I.

Spadille, Manille, two small Hearts or Diamonds, the Queen of Clubs and one small one, and four small Cards of the other Suits. Lead a small Trump.

II.

Spadille, Manille, two small Hearts or Diamonds, with the Knave and two small Clubs, and three small Cards of the other Suits. Lead a small Trump.

III.

Spadille, Manille, two small Hearts or
Diamonds,

Game of QUADRILLE. 9

Diamonds, three small Clubs, and three small Cards of the other Suits. Lead a small Trump.

IV.

Spadille, Punto, King, Queen, and one small Heart or Diamond, three small Clubs, the Queen, and one Spade. Lead Punto.

V.

Spadille, Punto, King, Knave, and one small Heart or Diamond, the Knave and two small Clubs, and two small Spades. Lead Punto.

VI.

Spadille, King, Queen, Knave, and one small Heart or Diamond, with the Queen, Knave, and one small Club, and two small Spades. Lead the King of Trumps.

VII

Spadille, Three, Four, Five, and Six of Hearts or Diamonds, King of Clubs and one more, Queen and two small Spades ; whether elder or any other Hand, when you have the Lead play a small Trump, in the second Lead play Spadille.

VIII.

Manille, Basto, Punto, and two small Hearts or Diamonds, three small Clubs, and the Knave and one Spade. Lead Manille.

IX.

N. B. Manille, Basto, King, and two small Hearts or Diamonds, Queen and one small Club, and three small Spades. Lead Manille.

X.

N. B. Manille, Basto, Queen, and two small Hearts or Diamonds, Queen and two small Clubs, Knave, and one Spade. Lead Manille.

XI.

Manille, Basto, with the three smallest Hearts or Diamonds, Queen and one small Club, Knave and two small Spades. Play a small Trump.

XII.

N. B. Manille, Punto, King, and two small Hearts or Diamonds, Queen, Knave, and one small Club, King and one small Spade. Lead Manille.

XIII.

Manille, Punto, Queen and two small Hearts or Diamonds, Queen and one small Club, King and two small Spades. Play a small Trump.

XIV.

Manille, Punto, and three small Hearts or Diamonds, Knave and one small Club, King, Queen, and one small Spade. Play a small Trump.

XV.

Game of QUADRILLE. II

XV.

Manille, and the four smallest Hearts or Diamonds, Queen, and one small Club, King, Queen, and one small Spade. Play a small Trump.

XVI.

N. B. Basto, Punto, King, and two small Hearts or Diamonds, King and Queen of Clubs, Queen, and two small Spades. Lead Basto.

XVII.

N. B. Basto, Punto, Queen, and two small Hearts or Diamonds, Queen, Knave, and one small Club, King and Queen of Spades. Lead Basto.

XVIII.

N. B. Basto, Punto, and three of the smallest Hearts or Diamonds, King and Queen of Clubs, Queen, Knave, and one small Spade. Play a small Trump.

XIX.

Basto, and the four smallest Hearts or Diamonds, King and Queen of Clubs, Queen, Knave, and one small Spade. Play a small Trump.

XX.

N. B. Punto, King, Queen, and two small Hearts or Diamonds, King and Queen of Clubs, Queen, Knave, and one small Spade. Lead Punto.

XXI.

Punto, King, and three small Hearts or Diamonds, King, and Queen of Clubs, Queen, Knave, and one small Spade. Play a small Trump.

You are to observe that those Cases which are mark'd thus, (*N. B.*) are very good Games to play, and that you have the Odds of your Side, to win those which are not marked.

C H A P. III.

Games in Black which may be played, calling a King.

I.

S P A D I L L E, Manille, and two small Clubs or Spades, the Knave and two small Hearts, and three small Diamonds. Lead a small Trump.

II.

N. B. Spadille, Manille, and two small Clubs or Spades, Queen, and two small Hearts, three small Diamonds. Lead a small Trump.

III.

Spadille, Manille, and two small Clubs or Spades, three small Hearts, three small Diamonds. Lead a small Trump.

IV.

N. B. Spadille, King, Queen, and two small Clubs or Spades, with the Queen
and

and one small Heart, three small Diamonds. Lead the King of Trumps.

V.

Spadille, King, Knave, and two small Clubs, Queen and two Diamonds, two small Hearts. Play a small Trump.

VI.

Spadille, Queen, and three small Clubs or Spades, Queen, and two small Hearts, two small Diamonds. Play a small Trump.

VII.

Spadille, and the four smallest Clubs or Spades, King and one small Heart, Queen and two small Diamonds. Play a small Trump.

VIII.

Manille, Basto, King, and two small Clubs or Spades, three small Hearts, and two small Diamonds. Lead Manille.

IX.

Manille, Basto, Queen, and two small Clubs or Spades, three small Hearts, Queen, and one small Diamond. Lead Manille.

X.

Manille, Basto, Knave, and two small Clubs or Spades, Knave, and one Heart, three small Diamonds. Lead Manille.

XI.

Manille, Basto, and three small Clubs or Spades, Queen and two small Hearts, Knave and one small Diamond. Lead Manille.

XII.

XII.

N. B. Manille, King, Queen, and two small Clubs or Spades, King, and one small Heart, Queen, Knave, and one small Diamond. Lead Manille.

XIII.

N. B. Manille, King, Knave, and two small Clubs or Spades, King, and one small Heart, Queen, and two small Diamonds. Lead Manille.

XIV.

Manille, King, and three small Clubs or Spades, Queen, and two small Hearts, King, and one small Diamond. Play a small Trump.

XV.

Manille, and the four smallest Clubs or Spades, King, Queen, and one small Heart, two small Diamonds. Play a small Trump.

XVI.

N. B. Basto, King, Queen, and two small Clubs or Spades, Queen and two small Hearts, King and one small Diamond. Lead Basto.

XVII.

N. B. Basto, King, Knave, and two small Clubs or Spades, Knave, and one Heart, King, and two small Diamonds. Lead Basto.

XVIII.

N. B. Basto, King, and three small Clubs

Game of QUADRILLE. 15

Clubs or Spades, King and Queen of Hearts, Queen, and two small Diamonds. Play a small Trump.

XIX.

Basto, and four of the smallest Clubs or Spades, King and Queen of Hearts, Queen, Knave, and one small Diamond. Play a small Trump.

XX.

N. B. King, Queen, Knave, and two small Clubs or Spades, King and Queen of Hearts, Knave, and two small Diamonds. Lead the King of Trumps.

XXI.

King, Queen, Seven, Six, and Five of Clubs or Spades, King and Queen of Hearts, Queen, Knave, and one small Diamond. Lead the King of Trumps.

You are to observe that those Cases which are mark'd thus (*N. B.*) are very good Games to play, and you have the Odds of your side, to win those which are not marked.

N. B. You are to call to your strongest Suits, except you have a Queen guarded. And, if you are elder Hand, you have a fairer Chance to win the Game than if middle Hand, because you have an Opportunity of leading a Trump, which frequently makes your Adversaries play against each other.

C H A P.

C H A P. IV.

Cases calculated, shewing the Players the Odds of winning the following Games at Quadrille, fans prendre; and also such Games as ought not to be played fans prendre.

GAMES in Black, Elder Hand.

I.

T H R E E Matadores in Clubs, King and Six of Diamonds, King and Six of Hearts, King, Five and Six of Spades. Play Trumps to all the elder-hand Games. The above Game wins 27 to 4.

II.

Three Matadores and the Three of Clubs, King and Six of Diamonds, King and Six of Hearts, and two small Spades. The above Game wins 215 to 162, or about 4 to 3.

III.

Three Matadores, Three and Four of Clubs, King and Six of Diamonds, three small Hearts. Wins 291 to 86, or above 10 to 3.

IV.

Three Matadores with the Three, Four, and Five of Clubs, two small Diamonds, and two small Hearts. Wins near 10 to 1.

V.

V.

Spadille, Manille, King, Knave, Three and Four of Clubs, two small Diamonds, two small Hearts. Wins 4895 to 3022, or about 8 to 5.

VI.

Spadille, Manille, King, Three, Four, and Five of Clubs, two small Diamonds, two small Hearts. Wins about 8 to 5.

VII.

Spadille, Manille, King, Three, and Four of Clubs, King and Six of Diamonds, and three small Hearts. Loses 1514 to 1125, or about 4 to 3.

VIII.

Spadille, Manille, Three, Four, Five, and Six of Clubs, two small Diamonds, and two small Hearts. Loses 1514 to 1125, or about 4 to 3.

IX.

Spadille, Manille, Three, Four, and Five of Clubs, King, and one small Diamond, and three small Hearts. Loses 2234 to 405, or about 11 to 2.

X.

Three false Matadores and Three of Clubs, King and Six of Diamonds, King and Six of Hearts, King and Six of Spades. Wins 215 to 162, or about 4 to 3.

IX.

Three false Matadores, Three and Four
of

18 *A short Treatise on the*
of Clubs, King and Six of Diamonds,
King, Six and Five of Hearts. Wins 291
to 86, or above 10 to 3.

XII.

Three false Matadores, Three, Four,
and Five of Clubs, King and Six of Dia-
monds, two small Hearts. Wins 1025 to
106, or near 10 to 1.

XIII.

Manille, Basto, Queen, Three, Four
and Five of Clubs, King and one small
Diamond, two small Hearts. Wins 4895
to 3022, or above 8 to 5.

XIV.

Manille, Basto, Knave, Three, Four
and Five of Clubs, King and one small
Diamond, two small Hearts. Loses 4162
to 3755, or almost 10 to 9.

XV.

Spadille, Three, Four, Five, and Six
of Clubs, King and one small Diamond,
King of Spades, King and one small
Heart. He must lead a small Trump, and
his Chance then for winning is 1749 to
890, or near 2 to 1 for winning.

XVI.

Spadille, Three, Four, Five, Six, and
Seven of Clubs, King and one Diamond,
King of Spades and King of Hearts.
Wins about 275 to 2.

CHAP. V.

GAMES *in Red, Elder Hand.*

THREE Matadores in Hearts, King and one Diamond, King and one Spade, King and two Clubs. Wins 24 to 11, or about 2 to 1.

II.

Three Matadores and Three of Hearts, King and one small Diamond, King and Queen of Clubs, and two small Spades. Wins 7010 to 1661, above 4 to 1; besides the Chance that his Kings and Queen pass, though he should not fetch out all the Trumps.

III.

Three Matadores and Three and Four of Hearts, King and one small Club, and three Diamonds. Wins almost 4 to 3.

IV.

Three Matadores, Three, Four, and Five of Hearts, two small Diamonds, two small Clubs. Wins 291 to 86, or above 10 to 3.

V.

Spadille, Manille, Punto, Queen, Three and Four of Hearts, two small Diamonds, and two small Clubs. Loses 1706 to 1339, or above 5 to 4.

VI.

VI.

Spadille, Manille, Punto, Three, Four and Five of Hearts, two small Diamonds, two small Clubs. Loses 1514, to 1125, or above 4 to 3.

VII.

Spadille, Manille, King, Three, Four and Five of Hearts, two small Diamonds, two small Clubs. Loses 278 to 99, or about 14 to 5.

VIII.

Spadille, Manille, Three, Four, Five, and Six of Hearts, two small Diamonds, two small Clubs. Loses above 3 to 1.

IX.

Spadille, Manille, Three, Four, Five and Six of Hearts, King and one Club, two small Diamonds. Wins 1845 to 794, or above 9 to 4.

X.

Spadille, Manille, Two, Three, Four, Five, Six of Hearts, two small Diamonds, one small Club. Wins above 9 to 1, nearer 10 to 1.

XI.

Four Matadores in Hearts, King and two small Clubs, King and two small Spades. Wins about 16 to 1. That he fetches out the Trumps is 7206 to 1465, near 5 to 1; besides the Chance for his King's passing, though the Trump should not fall.

XII.

XII.

Three false Matadores and Three of Hearts, King and one small Club, King and one Diamond, King, and one small Spade. Loses 5791 to 2880, or above 2 to 1.

XIII.

Three false Matadores, Three and Four of Hearts, King and one Club, King and two Spades. Wins 215 to 162, or about 4 to 3.

XIV.

Three false Matadores, Three, Four, and Five of Hearts, King and one small Club, two small Spades. Wins 291 to 86, or above 10 to 3.

XV.

Three false Matadores with the Knave, the Three, Four, and Five of Hearts, one small Diamond, two small Spades. Wins 1025 to 106, near 10 to 1; but you are to suppose the Lead is to come into your Hand a second time, without trumping with a Matadore.

XVI.

Three false Matadores with the Queen, the Three, Four, and Five of Hearts, one small Diamond, two small Clubs. (As the former) wins near 10 to 1.

XVII.

Manille, Basto, King, Three, Four and Five

Five of Hearts, King and one Diamond, two small Clubs. Loses 1514 to 1125, or about 4 to 3.

XVIII.

Manille, Basto, Queen, Three, Four, and Five of Hearts, King and one Club, two small Spades. Loses 278 to 99, or near 3 to 1.

XIX.

Manille, Basto, Three, Four, Five, and Six of Hearts, King and one Diamond, two small Clubs. Loses 2639 to 405 or about 6 to 1.

XX.

Spadille, Two, Three, Four, Five and Six of Hearts, King and one Diamond, King of Spades, and the King of Clubs. That he fetches out three Trumps by playing Spadille, is above 4 to 1, and consequently above 4 to 1 for winning.

XXI.

Spadille, Three, Four, Five and Six of Hearts, King and one Diamond, King and one Spade, and the King of Clubs.

That three sure Tricks in Trumps lie against the Player is 1384 to 1255, and consequently the Odds is against his winning the Game.

If he plays the Game, he must begin with leading a small Trump, for if he plays Spadille, he has no Chance at all.

At

At his second Lead he ought to play Spadille, having the fairest Probability of winning the Game by that Method of Play.

In all the Games of false Matadores, we have supposed the Player is not overruff'd before it comes again into his Hand.

N. B. If you should have a *Sans prendre* Game, and it should be 5 to 4 for winning it, you are to consider that the calling a King makes it a sure Game won, besides the Chance of winning a *Vole*; and therefore, upon a strict Calculation, it is found to be more adviseable to call a King in such a Case.

N. B. A good Player may play a weaker Game, either elder or younger Hand, than middle Hand.

CHAP. VI.

LAW S at QUADRILLE.

I.

WHOMEVER names any Suit for Trumps, he must abide by it, tho' it should happen to be his worst Suit.

II.

If a Card happens to be faced in Dealing you must deal again, except it is the last Card.

III.

If you play with eleven Cards you are beasted.

IV.

IV.

If you play *Sans prendre*, or have *Matadores*, you are to demand them before the next Dealer has finished his Deal, otherwise you lose the Benefit of them.

V.

If any Body names his Trump without asking Leave, he is obliged to play *Sans prendre*, unless he is the younger Hand, and all the rest have pass'd.

VI.

If any Body plays out of his Turn, that Card played may be called at any time in that Deal, provided he does not revoke; or the Adversaries may demand the Partner of him, who played out of his Turn, or his own Partner, to play any Suit he thinks fit.

VII.

After the Game is won, if the Person who won the fixth Trick plays a seventh Card, he is obliged to play for the *Vole*.

VIII.

If you have four Kings dealt you, you are at Liberty either to call a Queen to one of your Kings, or to call one of your Kings; but you are not to call the Queen of Trumps.

IX.

If any Body separates a Card from the
rest

rest, he ought to play it, if the adverse Party has seen it, unless he plays *Sans prendre*.

X.

If the King called, or his Partner plays out of his Turn, no *Vole* is to be played for.

XI.

No Person is to be beasted for a Renounce, unless the Trick is turned and quitted; and if any Person renounces, and it is discovered, if the Player should happen to be beasted by such Renounce, all the Parties are to take up their Cards and play them over again.

XII.

If Spadille is forced to play, he is not obliged to make his three Tricks.

XIII.

Whoever undertakes playing the *Vole*, has the Preference of playing before him who offers to play *Sans prendre*.

XIV.

If all Parties agree to it, before you begin to play, let the Person have the Preference of playing who plays for the most Tricks; which will prevent small Games from being played.

XV.

The Player is entitled to know who is his King called, before he declares for the *Vole*.

XVI.

When six Tricks are won, he who won

the sixth Trick ought to say, I play the *Vole* ; or I do not play the *Vole* ; or I ask — and nothing else,

XVII.

He who wins the *Vole* is to take double the Stake played for out of the Pool.

XVIII.

He who asks leave (if elder Hand) may play *Sans prendre*, in Preference to any of the other Players.

XIX.

If you have one King only, you may call yourself, but must win six Tricks.

XX.

If you play the King surrendered, he must win six Tricks who demands the King of any Body.

XXI.

He who has passed once, (unless he has Spadille,) has no right to play afterwards also, he who has asked the Question is obliged to play, unless some Body else plays *Sans prendre*.

XXII.

If the Player, or his Friend, shew their Cards before they have won six Tricks, the Adversaries may call their Cards as they please, specifying each Card.

XXIII.

Whoever has asked leave cannot play *Sans prendre*, unless he is forced.

XXIV.

XXIV.

You are at Liberty to look at the Tricks when you are to lead, but not otherwise.

XXV.

Whoever undertakes playing for the *Vole*, and does not succeed, has a Right to the Stakes *Sans prendre*, and Matadores if he has them, having won his Game.

XXVI.

Forced Spadille cannot play for the *Vole*.

XXVII.

If any Person discovers his Game, he is not entitled to play the *Vole*.

XXVIII.

If there happen to be two Cards of the same sort, and found out before the Deal is ended, the Deal is void ; but not otherwise.

XXIX.

No Body is to declare how many Trumps are played out.

XXX.

He who plays, and does not make three Tricks, is to be beasted alone, unless he plays forced Spadille.

End of QUADRILLE.

On the GAME of

P I Q U E T.

C H A P. I.

General R U L E S *for playing at* P I Q U E T.

O U are to play by the Stages of your Game ; what is meant by them is, that when you are backwards in the Game, or behind your Adversary, you are to play a pushing Game, otherwise you are to make twenty-seven Points elder Hand, and thirteen Points younger Hand ; and you are always to compare your Game with your Adversary's, and discard accordingly.

II.

You are to discard in expectation of winning the Cards, which is so essential a Part of the Game, that it generally makes twenty-two or twenty three Points difference; therefore you are not to discard for low *Quatorze*, such as three Queens, three Knaves, or three Tens, because in any of these Cases, the Odds are three to one, elder-hand, that you do not succeed, and seventeen to three younger Hand; for let us suppose you should go for a *Quatorze* of Queens, Knaves or Tens, and throw out an Ace or a King, by so doing you run the Risk of losing above twenty Points in expectation of winning fourteen Points.

III.

At the beginning of a Party you are to play to make your Game, which is twenty-seven Points elder Hand, and thirteen Points younger Hand: therefore suppose you are elder Hand, and that you have a *Terce-major* and the Seven of any Suit, it is five to two but that you take in one Card out of any four certain Cards; therefore suppose you should have three Queens, three Knaves, or three Tens, you are in this case to discard one of them preferably to the Seven of such a Suit, because it is three to one that you do not take in any
one

one certain Card elder Hand to make you a *Quatorze*, and consequently you discard the Seven of such a Suit to a great Disadvantage.

IV.

If your Adversary is greatly before you in the Game, the Consideration of winning the Cards must be put quite out of the Question: therefore suppose you should have a *Quart* to a Queen, or a *Quart* to a Knave; in which Case it is only about five to four, being elder Hand, but that you take in a Card to make you a *Quint*, and about three to one but that you take in a Queen, a Knave, or Ten, and should you have three of either dealt you, it is good play to make a Push for the Game, particularly if it is so far advanced as to give you but little Chance for it in another Deal; and in this, and other Cases, you may have recourse to the Calculations ascertaining the Odds.

V.

To gain the Point, generally makes ten Points difference; therefore when you discard, you must endeavour to gain it, but not risk the losing of the Cards by so doing.

VI.

The saving of your Lurch, or the lurching of your Adversary, is so material, that

that you ought always to risk some Points to accomplish either of them.

VII.

If you have six Tricks with any winning Card in your Hand, never fail playing that Card, because at least you play eleven Points to one against yourself by so doing, unless in Play you discover what Cards your Adversary has laid out.

VIII.

If you are greatly advanced in the Game, as suppose you are eighty to fifty, in that Case it is your Interest to let your Adversary gain two Points for your one as often as you can, especially if the next Deal you are to be elder Hand ; but if on the contrary, you are to be younger Hand, and are eighty-six to fifty or sixty, never regard the losing two or three Points for the gaining of one ; because that Point brings you within your Shew.

IX.

The younger Hand is to play upon the Defensive ; therefore, in order to make his thirteen Points, he is to carry *Terces*, *Quarts*, and especially to strive for the Point : but suppose him to have two *Terces* from a King, Queen, or Knave, as it is twenty-nine to twenty-eight that he succeeds, he having in that Case four certain Cards to take in to make him a *Quart* to
either

either of them, and, perhaps, thereby save a *Pique*, &c. he ought preferably to go for that which he has the most Chance to succeed in : But if instead of this Method of play, he has three Queens, Knaves, or Tens, and should attempt to carry any of them preferably to the others, the Odds that he does not succeed being seventeen to three against him, he consequently discards to a great Disadvantage.

X.

The elder or younger Hand, is sometimes to sink one of his Point, a *Terce*, or three Kings, Queens, Knaves, or Tens, in hopes of winning the Cards ; but that is to be done with Judgment, and without hesitating.

XI.

It is often good Play for a younger Hand not to call three Queens, Knaves, &c. and to sink one Card of his Point, which his Adversary may suppose to be a Guard to a King or Queen.

XII.

The younger Hand having the Cards equally dealt him, is not to take in any Card if thereby he runs the Risk of losing them, unless he is very backward in the Game, and has then a Scheme for a great Game.

XIII.

If the younger Hand has a Probability of saving or winning the Cards by a deep
Discard :

Discard : As for Example ; Suppose he should have the King, Queen, and Nine of a Suit, or the King, Knave, and Nine of a Suit ; in this Case he may discard either of those Suits, with a moral Certainty of not being attacked in them, and the Odds that he does not take in the Ace of either of those Suits being against him, it is not worth his while to discard otherwise in expectation of succeeding.

XIV.

The younger Hand having three Aces dealt him, it is generally his best play to throw out the fourth Suit.

XV.

The younger Hand is generally to carry Guards to his Queen-Suits, in order to make Points, and to save the Cards.

XVI.

When the younger Hand observes that the elder Hand, by calling his Point, has five Cards which will make five Tricks in play, and may have the Ace and Queen of another Suit, he should throw away the Guard to that King, especially if he has put out one of that Suit, which will give him an even Chance of saving the Cards.

XVII.

If the elder Hand has a *Quart* to a King dealt him, with three Kings and three Queens,

Queens, (including the King to his *Quart*) and that he is obliged to discard, either one of his *Quart* to the King, or to discard a King or Queen.

Query. Which is best for him to discard?

Answer. The Chance for taking in the Ace or Nine to his *Quart* to a King, being one out of two certain Cards, is exactly equal to the taking either a King or a Queen, having three of each dealt him ; therefore he is to discard in such a manner as gives him the fairest Probability of winning the Cards.

The foregoing Case may be a general Direction to discard in all Cases of the like Nature, either for the elder or younger Hand.

XVIII.

Suppose the elder Hand has taken in his five Cards, and that he has the Ace, King, and Knave of a Suit, having discarded two of that Suit : He has also the Ace, King, Knave, and two small Cards of another Suit, but no winning Cards in the other Suits.

Query. Which of these Suits is he to play from, in order to have the fairest Chance of winning, or saving the Cards?

Answer. He is always to play from the Suit of which he has the fewest in Number ; because, if he finds his Adversary guarded

guarded there, the Probability is in his Favour that he is unguarded in the other Suit; and should he play from the Suit of which he has the most in Number, and finds his Adversary's Queen guarded, in that Case he has no Chance to save or win the Cards.

XIX.

If the elder Hand is sure to make the Cards equal, by playing of them in any particular Manner, and is advanced before his Adversary in the Game, he is not to risk the losing of them; but if his Adversary is greatly before him, in that case it is his Interest to risk the losing of the Cards, in Expectation of winning of them.

CHAP. II.

Particular RULES *and* CASES.

I.

SUPPOSE you are elder Hand, and that you have dealt you a *Quart-major*, with the Seven and Eight of Clubs, the King and Ten of Diamonds, the King and Nine of Hearts, with the Ten and Nine of Spades.

Query. Whether you are to leave a Card, by carrying the *Quart-major* and two more of the same Suit for the Point, with
two

two other Kings; or to throw out one Card of your Point?

Answer. If you throw out one Card of your Point, there is a possibility that you reckon only five Points, and that your Adversary may win the Cards, by which Event he gets eleven Points, besides his three Aces, &c. which gives you a bad Chance for the Game: But by leaving a Card, and admitting that one Card of Consequence lies in the five Cards which you are intitled to take in, it follows, that you have four Chances to one against leaving that Card, and consequently it is your Interest to leave a Card; the Odds are also greatly in your Favour, that you take in some one of the following Cards in four Cards, *viz.* there are two to your Point, three Aces, and one King.

II.

If you should happen to have the Ace, King, and four small Cards of any Suit, with two other Kings, and no great Suits against you, the like Method of the former Case may be practised.

III.

Suppose you should have the King, Queen, and four of the smallest Clubs, the King and Queen of Diamonds, the Ace and Knave of Hearts, and the King and Nine of Spades.

Query,

Query. How are you to discard, with a Probability of making the most Points?

Answer. You are to throw out the Queen and four small Clubs, and to carry three entire Suits, with the King of Clubs; for this Reason, because the Chance for your taking in the fourth King, is exactly the same as the Chance of taking in the Ace of Clubs; in either of which Cases it is three to one against you: But if you fail of taking in the fourth King, by discarding thus, you have a fair Chance to win the Cards, which will probably make twenty-two Points Difference. But should you discard with an Expectation of taking in the Ace of Clubs, and should happen to fail, you being obliged to throw out some of your great Cards, you would have a very distant Chance of either saving or winning the Cards.

IV.

Suppose you should have the King and Queen of Clubs, a *Terce-major* in Diamonds, Queen and Knave of Hearts, and a *Quint* from the Knave in Spades.

Query. How are you to discard with a Probability of making the most Points?

Answer. You are to throw out the *Quint* to a Knave in Spades, in order to make the most Points; because, let us admit that your *Quint* is good for every thing after

after you have taken in, you in that Case only score nineteen Points, if you carry it, and you probably give the Cards up, and also the Chance of a *Quatorze* of Queens, besides a great Number of Points in play; and consequently, by carrying the *Quint*, you would discard to a great Disadvantage.

V.

Suppose you have the King, Queen, Seven, Eight, and Nine of Clubs; the Queen and Knave of Diamonds; the Queen, Ten, and Nine of Hearts, with the Ace and Nine of Spades.

Query. How are you to discard?

Answer. You are to discard the King, Seven, Eight, and Nine of Clubs, and the Nine of Spades, by which means you do not only go for three Suits, but you have the same Chance for taking in the fourth Queen as you would have to take in the Ace of Clubs: Besides, the Probability of winning the Cards is greatly in your Favour by this Method of discarding.

VI.

Suppose you have the Queen, Ten, Nine, Eight, and Seven of Clubs; the Knave and Ten of Diamonds; the King, Queen, and Knave of Hearts, with the Ace and Nine of Spades.

Query. How are you to discard?

Answer. You are to discard the five Clubs;

Clubs ; because it is three to one that you do not take in the Knave of Clubs, and the carrying three entire Suits gives you a fairer Chance to score more Points.

VII.

Suppose you have the Ace, Queen, and Knave of Clubs ; the King, Queen, and Knave of Diamonds ; the Queen and Knave of Hearts, with the Ten, Nine, Eight, and Seven of Spades.

Query. How are you to discard ?

Answer. You are to discard the Ace of Clubs and the four Spades, because it is only five to four but that you take in a Queen or a Knave : It is also about three to two that you take in an Ace : You have also three Cards to your *Terce* to a King to take in, *viz.* the Ace and Ten, or the Ten and Nine, to make you a *Quint* ; all which Circumstances considered, you have a fair Probability of making a great Game ; whereas if you should leave a Card, by throwing out the four Spades only, you run the Risk of leaving one of the following Cards, *viz.* the King of Clubs, the Ace of Diamonds, the Ace, Queen, or Knave of Spades ; in any of which Cases you would probably lose more Points than by throwing out the Ace of Clubs ; and if you should carry two Suits, *viz.* three.

three Clubs, three Diamonds, and the Queen of Hearts, you run the Risk of putting out fourteen Points ; and it is only five to four against your taking in a Queen or a Knave, and therefore you would discard to a great Disadvantage.

VIII.

Suppose you have the King, Queen, and Ten of a Suit, and that your Adversary has the Ace, Knave, and one small Card of that Suit ; and that you have only those three Cards left, and you are to make three Points of them.

Query. What Cards are you to play ?

Answer. You are to play the Ten.

IX.

Suppose you have the Ace, Queen, Ten, and Nine of Clubs ; also the King, Queen, Ten, and Nine of Diamonds.

Query. Which of these Suits are you to carry, in order to have the fairest Probability of scoring the greatest Number of Points ?

Answer. You are to carry the King, Queen, Ten, and Nine of Diamonds, because the Chance of taking in the Ace of Diamonds is exactly equal to that of taking in the King of Clubs ; and also the Chance of taking in the Knave of Diamonds is equal to that of taking in the Knave of Clubs ; by which manner of discarding,

carding, you have a Probability of scoring fifteen Points for your *Quint* in Diamonds instead of four Points for the *Quart* the Clubs, and the Chance for winning in Cards is better, because by taking in the Ace of Diamonds you have seven Tricks certain, which cannot happen by taking in the King of Clubs.

X.

Suppose you have four Aces, and two Kings dealt you younger Hand, in order to capot the elder Hand, you are to make a deep Discard, such as the Queen, Ten, and Eight of a Suit ; by which means, if you happen not to take in any Card to such Suit, you may probably capot the Adversary.

XI.

Suppose, elder Hand, that you have the Ace, Queen, Seven, Eight, and Nine of Clubs ; also the Ace, Knave, Seven, Eight, and Nine of Diamonds.

Query. Which Suit are you to carry, in order to make the most Points ?

Answer. You are to carry the Ace, Knave, Seven, Eight, and Nine of Diamonds, because the taking in the King of Diamonds is equal to the taking in of the King of Clubs, and consequently as good for winning the Cards ; but you have the Chance of taking in the Ten of Diamonds to

to make you fifteen Points, which Event cannot happen by taking in any one certain Card in Clubs.

XII.

Suppose, elder Hand, that you have the Ace, Queen, Seven, Eight, and Ten of Clubs; also the Ace, Knave, Seven, Eight, and Ten of Diamonds.

Query. Which Suit is best to carry?

Answer. You are to carry the Ace, Knave, Seven, Eight, and Ten of Diamonds, because the Chance of taking in the King of Diamonds is equal to the Chance of taking in the King of Clubs, and consequently as good for winning the Cards; but you have an additional Chance of taking in the Nine of Diamonds to make you fifteen Points, which Event cannot happen by taking in any one certain Card in Clubs.

XIII.

Suppose you have the Ace, Queen, Ten, and two more of a Suit; also the Ace, Queen, and Ten of another Suit only. And let us suppose, that your Adversary has shewn six Cards for his Point; suppose the Ace, Queen, and four small ones, and suppose you are guarded in that Suit; as soon as you have the Lead, you are to play from the Suit of which you have the fewest in Number, because if he is guard-
ed

ed in that Suit, he is probably unguarded in the other Suit ; but should you begin with the Suit of which you have the most in Number, if he happens to be guarded there, you have then no Chance to win the Cards ; which may prove otherwise, if you begin with the Suit of which you have the fewest in Number. If he is guarded in both Suits, you have no Chance to win the Cards.

CHAP. III.

Some Computations, directing with moral Certainty how to discard well any Hand.

I.

THE Chance of an elder Hand's taking one certain Card is 3 to 1 against him.

II.

That of his taking two certain Cards is 18 to 1 against him.

III.

I would know what are the Odds that an elder Hand takes in four Aces ?

Answer. That he takes against him, for him
in 4 Aces is - - { 968 to 1

At least 3 of them is about 33 to 1
2 of them 3 to 1
1 of them 2 to 5

IV.

IV.

If an elder Hand has one Ace dealt him, what are the Odds that he takes in the other three?

Answer. That he takes } against him. for him
in the 3 Aces - - - - } 113 to 1
At least 2 of them about 6 to 1
1 of them 2 to 3

V.

If an elder Hand has two Aces dealt him, what are the Odds that he takes in the other two?

Answer. That he takes } against him. for him
in the other 2 Aces is - } 18 to 1
At least 1 of them is }
near 5 to 4 against him, } 21 to 17
or - - - - - }

VI.

In case the elder Hand has two Aces and two Kings dealt him, what are the Odds that he takes in either the two Aces or two Kings remaining?

Answer. It is about } against him. for him
17 to 2

VII.

Elder Hand having neither Ace nor King dealt him, what is his Chance to take in both an Ace and a King in 2, 3, 4, or 5 Cards?

Answer. In 2 Cards is about } against him. for him
11 to 1
In

In 3 Cards	4	to	1
In 4 Cards	9	to	5
In 5 Cards	33	to	31

VIII.

What are the Odds that a younger Hand takes in two certain Cards?

Answer. - - - - - against him. for him
62 to 1

What are the Odds that a younger Hand takes in three certain Cards?

Answer. - - - - - against him. for him
1139 to 1

IX.

The younger Hand having no Ace dealt him, what Chance has he for his taking one?

Answer. It is - - - - - against him. for him
28 to 29

X.

If the younger Hand has one Ace dealt him, what are the Odds of his taking in one or two of the three remaining Aces?

Answer. That he takes } against him. for him
in two of them is about } 21 to 1
At least one of them } 3 to 2

XI.

What are the Odds, that the younger Hand takes in one certain Card?

Answer. That he does } against him. for him
not take it in, is - - } 17 to 3

What is the Odds of a *Quart-Blanch*?

Answer. - - - - - against him. for him
1791 to 1

C H A P. IV.

An EXPLANATION and APPLICATION of the foregoing CALCULATIONS.

I.

AS by the first Calculation it is three to one, that being elder Hand, you do not take in one certain Card ; you have, therefore, a better Chance of advancing your Game, by carrying two Suits for Points and the Cards, than by aiming at *Quatorze* of Queens, Knaves, or Tens.

II.

Second Calculation ; to take in two certain Cards elder Hand, is eighteen to one against you.

Therefore suppose you have a *Quart-major*, and two other Aces dealt you, the Odds that you do not take in the Ten to your *Quart-major*, and the other Ace, is eighteen to one against you ; but that you take in one of them, is only twenty-one to seventeen against you. And suppose you have three Aces and three Kings dealt you, the Odds are eighteen to one against you, taking in the other Ace and the other King ; yet it is not much above five to four but that you take in one of them.

H

This

This Example shews, how you are to discard in Cases of the like Nature.

III.

The Odds in taking in four certain Cards, as four Aces, &c. being nine hundred and fixty-eight to one by the third Calculation, is so great a Chance of not succeeding, that it is scarce worth further Notice.

But to take in three Cards out of any four certain Cards, elder Hand, is only thirty-three to one against you.

EXAMPLE.

Suppose you have two Aces and two Kings dealt you, the Odds of taking three of them out, of four certain Cards, such as two Kings and one Ace, or two Aces and a King, are only thirty-three to one against you.

But suppose you should want to take in any two out of four certain Cards, such as the Queen of Clubs, the Ten of Diamonds, the Ace of Spades, and Knave of Hearts, being elder Hand, it appears by the Calculation to be three to one against you; and the Odds are the same for any two out of four certain Cards.

But if, being elder Hand, you only want one Card out of four, the Odds are five to two in your Favour, that you take it in. Therefore, if you have four Tens,
or

or any inferior *Quatorze* dealt you, and no Ace, it is great Odds in your Favour that, being elder Hand, you take in one Ace, and ought to play your Game accordingly. But you must always consider the Disadvantage either of losing the Cards, or even the Risk of a Capot, which you run the Hazard of, by spoiling your Hand, with keeping four Tens when they are not good.

IV.

By the fourth Calculation; if you have one Ace dealt you, it is one hundred and thirteen to one, that you do not take in the three others; forty-nine to eight, or about six to one, that you do not take in two out of the three; but that you take in one out of the three, is about three to two in your Favour, or one hundred and thirty-seven to ninety-one.

As for EXAMPLE.

You have a *Quart* from a King, and two Kings more dealt you, as it is three to two that you take in either Ace or Nine to your *Quart* to the King, or the fourth King, as you have the Chance of reck'ning fourteen or fifteen Points by this Method of discarding: You ought to play accordingly, and this Method shews you how to play any Hand of the like Sort.

But if you should discard, with an Ex-

pectation of taking in two Cards out of three certain Cards, the Odds against such an Event being above six to one; your Game must indeed be very desperate, if you attempt to discard to that Purpose. The Chance of taking in three certain Cards being one hundred and thirteen to one, is a very distant Chance, yet even such does happen sometimes, but ought never to be ventured upon, but when a Man has no other Resource in the Game.

V.

The fifth Calculation is, that if you have two Aces dealt you, it is eighteen to one that you do not take in the two other Aces; but only seventeen to twenty-one that you take in one of them: Let us illustrate the use of this by an Example; suppose you have a *Quart-major* dealt you, and a *Quart* to a King, and that you are greatly behind your Adversary in the Game: To take in the Ten to your *Quart-major* is three to one against you; but to take in the Ace or Nine to your *Quart* to the King, is only about five to four against you.

Also, by the same Rule, suppose you have three Kings and three Queens dealt you, the Odds of your taking in both a King and a Queen are eighteen to one against

against you; but that of your taking one of them, is only five to four against you.

All other Cases of the like Nature may be discarded by this Method of Calculation.

VI.

As, by the sixth Calculation, it is seventeen to two that you do not take in two certain Cards out of four, such as two Kings, two Queens, &c. You must not, therefore, confound this with the third Calculation, where the Odds are not above three to one that you take in two Cards out of the four.

VII.

Having neither an Ace nor a King dealt you, what are the Odds of your taking in both an Ace and a King in two, in three, in four, or in five Cards?

Answer. To take in an Ace and a King.

	against you.	for you
In 2 Cards is about	11	to 1
In 3 Cards	4	to 1
In 4 Cards	9	to 5
In 5 Cards	33	to 31

You may observe, by the foregoing Calculation, what are the Odds of taking in two, three, four, or five Cards out of any eight certain Cards, and consequently discard to the greatest Advantage.

The foregoing Calculation is either for the elder or younger Hand.

EXAMPLE.

Let us suppose the younger Hand to have two *Quatorze* against him, he may observe, that it is not above four to one but that he takes in one of each of them. The like Rule may serve for any other eight certain Cards.

VIII.

As by the eighth Calculation it is sixty-two to one that the younger Hand does not take in two certain Cards, which Event happening, he ought not therefore to run the Hazard of so great a Chance, but when his Game is desperate, and does not promise him another Deal:

IX.

By the ninth Calculation, as it is twenty-nine to twenty-eight that the younger Hand takes in one Ace, having none dealt him: The Calculation is the same for any Card out of four certain Cards.

As for EXAMPLE.

Suppose you have two *Quarts* dealt you from the King or Queen of any Suit, it is the same Odds of twenty-nine to twenty-eight, but that you take in a Card to make one of them a *Quint*, and therefore you are to discard accordingly.

As also, that you take in either Ace,
King,

King, Queen, Knave, of any one Suit, when a Pique or a Repique is against you.

X.

The Tenth Calculation is, that if the younger Hand has one Ace dealt him, it is twenty-one to one that he does not take in two Aces, and about three to two that he does not take in one of them; which Calculation holds good in the taking in any three other certain Cards. Therefore, for Example, let us suppose, that as it is but three to two against the younger Hand's taking one Card out of three to save a Pique, or a Repique, it would generally be reckoned good Play either to throw one from his Point, or discard a King, &c. for the Event of such a Chance.

XI.

By the eleventh Calculation it is seventeen to three, younger Hand, against your taking in any one certain Card; therefore, the Odds of not succeeding in this Case are so greatly against you, that it ought not to be attempted, especially if the winning or saving the Cards is risked by so doing, except in desperate Cases.

C H A P. V.

CASES of C U R I O S I T Y and
I N S T R U C T I O N.

I.

SUPPOSE you are younger Hand, and that you have the Queen, Knave, Seven, Eight, and Nine of Clubs ; also the Seven, and Eight of Diamonds, the Seven of Hearts, and the Ten, Nine, Eight and Seven of Spades ; and that the elder Hand has left a Card :

Query. How are you to discard, to put it in the Power of the Cards to repique the elder Hand ?

Answer. You are to carry the five Clubs and the four Spades, and to leave a Card ; and by taking in the Ace, King, and Ten of Clubs, you repique your Adversary.

II.

Suppose you have eight Clubs, the Ace and King of Diamonds, the Ace of Hearts, and the Ace of Spades :

Query. Whether you repique the younger Hand, or not ?

Answer. The younger Hand may have a *Quart-blanche*, by having three *Quarts* from a Ten, which reckons first ; and therefore he is not repiqued.

III.

III.

What is the highest Number to be made of a Pique ?

Answer. Eighty-two Points.

What are the Cards which compose that Number ?

Answer. A *Quart-major* in Clubs, a *Quart-major* in Diamonds, Ace, King, and Ten of Hearts, with the Ace of Spades.

This is only upon Supposition that the *Quart-major* is good for every thing.

IV.

What is the highest Number to be made of a Repique and Capot ?

Answer. A hundred and seventy Points.

What are the Cards which compose that Number ?

Answer. The four *Terce-majors*, which are supposed to be good for every thing.

V.

Suppose you are elder Hand and that you want eight Points of the Game, and that the younger Hand wants twenty-three Points ; and suppose you have dealt you the Ace, King and Queen of Clubs ; the Ace, King, and Ten of Diamonds ; the Ace, Knave, and Nine of Hearts ; the Knave, Nine, and Seven of Spades :

Query. How are you to discard, to prevent any Possibility of the younger Hand's

154 *A Treatise on PIQUET.*

making twenty three Points, and he is not to reckon a *Charte-blanche*.

Answer. You are to discard the King and Queen of Clubs, and the Knave, Nine, and Seven of Spades; by which Method of discarding you are certain to make eight Points, before the younger Hand can make twenty-three Points.

VI.

Suppose you have the Ace, Queen, and Knave of Clubs, with the King and Ten of Diamonds; and suppose your Adversary has the Ace, Queen, and Knave of Diamonds, and the King and Ten of Clubs, your Adversary being to lead, is to make five Points, or to lose the Game.

Query. How shall you play to prevent him from making of five Points?

Answer. When he plays his Ace of Clubs, you are to play your King of Clubs; by which means he can make only four Points.

VII.

A and *B* plays a Partie at Piquet.

They are one Game each of the Partie.

A has it in his Power to win the second Game; but then he is younger Hand at the Beginning of the next Game.

A has it also in his Power to reckon only ninety-nine Points of the second Game, and *B* is to be seventy:

Query.

Query. Whether it is *A*'s Interest to win the second Game or not?

Answer. It is *A*'s Interest to win the second Game, in the Proportion of fourteen to thirteen in his Favour.

CHAP VI.

Some COMPUTATIONS for laying Money at the Game at Piquet.

I.

IT is five to four that the eldest Hand wins the Game.

II.

It is about two to one that the eldest Hand does not lurch the younger Hand.

III.

It is near four to one that the younger Hand does not lurch the elder Hand.

Suppose A and B make a Partie at Piquet.

I.

A has the Hand ; what's the Odds that *A* wins the Partie?

Answer. It is about twenty-three to twenty.

II.

If *A* has one Game, and *B* one Game, he who is eldest Hand has above five to four to win the Partie.

III.

If *A* has two Games Love before they

cut for the Deal, the Odds are above four to one that he wins the Partie.

IV.

If *A* has two Games Love, and *A* has the Hand, the Odds are about five to one that he wins the Partie.

V.

If *B* has the Hand when *A* is two Love, the Odds in Favour of *A* are about three and a half to one.

VI.

If *A* has two Games, and *B* one, before they cut, the Odds in favour of *A* are above two to one.

VII.

If *A* has the Hand and two Games to one, the Odds are about eleven to four.

VIII.

If *B* has the Hand, when *A* is two Games to one, the Odds in favour of *A* is about nine to five.

IX.

If *A* is one Game Love, and elder Hand, the Odds in Favour of *A* is about seventeen to seven.

X.

If *A* is one Game Love, and younger Hand; the Odds in Favour of *A* is about two to one.

CHAP.

C H A P. VII.

L A W S of the Game at Piquet.

I.

THE elder Hand is obliged to lay out one Card.

II.

If the elder Hand takes in one of the three Cards which belongs to the younger Hand, he loses the Game.

III.

If the elder Hand, in taking his five Cards, should happen to turn up a Card belonging to the younger Hand, he is to reckon nothing that Deal.

IV.

If the elder or younger Hand play with thirteen Cards, he counts nothing.

V.

If the elder Hand has thirteen Cards dealt him, it is in his Option whether he will stand the Deal or not ; and if he chuses to stand the Deal, he is to discover it, and to discard five Cards, and to take in four only.

VI.

If the elder or younger Hand reckons what they have not, they count nothing.

VII.

If the elder Hand touches the Stock after he has discarded, he cannot alter his Discard.

VIII.

VIII.

If a Card is faced, and it happens to be discovered either in dealing, or in the Stock, there must be a new Deal, unless it be the bottom Card.

IX.

If the Dealer turns up a Card in dealing, belonging to the elder Hand, it is in the Option of the elder Hand to have a new Deal.

X.

If the younger Hand takes in five Cards, it is the Loss of the Game, unless the elder Hand has left two Cards.

XI.

If the elder Hand calls forty-one for his Point, which happens to be a *Quart-major*, and it is allowed to be good, and only reckons four for it, and plays away, in this Case he is not intitled to count more.

XII.

If the elder Hand shews a *Point*, or *Quart*, or *Terce*, and asks if they are good, and afterwards forgets to reckon any of them, it bars the younger Hand from reckoning any of equal Value.

XIII.

Charte-blanche counts first, and consequently saves Piques and Repiques: It also piques and repiques the Adversary in
the

the same manner, as if those Points were reckoned in any other way.

XIV.

Quarte-blanche reckons before any thing else; but need not be shewn till the Adversary has first discarded; only if you are eldest Hand, you must bid the younger Hand to discard for *Quarte-blanche*; which after he has done, you shew your *Blanche* by counting your Cards down one after another.

XV.

You are to cut two Cards at the least.

XVI.

If you call a Point, and do not shew it, you reckon nothing for it; and the younger Hand may shew, and reckon his Point.

XVII.

If you play with eleven Cards, or fewer, no Penalty attends it.

XVIII.

If the elder Hand leaves a Card, and after he has taken in, he happens to put to his Discard the four Cards taken in, they must remain with his Discard, and he only play with eight Cards, viz. those added to his Discard.

XIX.

If the younger Hand leaves a Card or Cards, and mixes it with his Discard
before

before he has shewn it to the elder Hand, who is first to tell him what he will play, the elder Hand is intitled to see his whole Discard.

XX.

If the younger Hand leaves a Card or Cards, and does not see them, nor mixes them to his Discard, the eldest-Hand has no Right to see them; but then they must remain separate whilst the Cards are playing, and the younger Hand cannot look at them neither all that while.

XXI.

If the younger Hand leaves a Card or Cards, and looks at them, the elder Hand is intitled to see them, first declaring what Suit he will lead.

XXII.

If the Dealer deals a Card too many or too few, it is in the Option of the elder Hand to have a new deal; but if he stands the Deal, he must leave three Cards for the younger Hand.

XXIII.

You are, in the first Place, to call your Point; and if you have two Points, if you design to reckon the highest, you are to call that first, and are to abide by your first Call.

XXIV.

You are to call your *Terces*, *Quarts*,
Cinques,

Cinques, &c. next ; and to call the highest, of them, in case you design to reckon them.

XXV.

You are to call a *Quatorze*, preferable to three Aces, &c. if you design to reckon them.

XXVI.

If you call a *Terce*, having a *Quart* in your Hand, you must abide by your first Call.

SOME

S O M E
 RULES *and* OBSERVATIONS
 F O R
Playing well at CHESS.

I.

YOU ought to move your Pawns before you stir your Pieces, and afterwards to bring out your Pieces to support them ; therefore the Kings, Queens, and Bishops Pawns should be the first played, in order to open your Game well.

II.

You are not, therefore, to play out any of your Pieces early in the Game, because you thereby lose Moves, in case your Adversary has it in his Power, by playing a Pawn upon them, to make them retire, and also opens his Game at the same time ; especially avoid playing your Queen out, 'till your Game is tolerably well opened.

III.

III.

Avoid giving useless Checks, and never give any, unless you thereby gain some Advantage, because you may lose the Move if he can either take or drive your Piece away.

IV.

Never crowd your Game by having too many Pieces together, for fear of choking up your Passage so as to hinder your advancing or retreating your Men as Occasion may require.

V.

If your Game happens to be crowded, endeavour to free it by making Exchanges of Pieces or Pawns, and Castle your King as soon as you conveniently can.

VI.

Endeavour to crowd the Adversary's Game, which is to be done thus; when he plays out his Pieces before he does his Pawn, you are to attack them as soon as you can with your Pawns, by which you make him lose Moves, and consequently crowd him.

VII.

Never attack the Adversary's King without a sufficient Force; and if he attacks your King, and you have it not in your Power to attack his, you are to offer Exchanges with him; and if he retires,
when

when you present a Piece to exchange, he may lose a Move, and consequently you gain an Advantage.

VIII.

Play your Men in so good Guard of one another, that if any Man you advance be taken, the adverse Piece may also be taken by that which guarded yours; and for this Purpose, be sure to have as many Guards to your Piece, as you see your Adversary advances Pieces upon it; and if you can, let them be of less Value than those he assails with. If you find that you can't well support your Piece, see if by attacking one of his that is better, or as good, whether you can't thereby save yours.

IX.

Never make an Attack but when well prepared for it; nor give useless Checks, for thereby you open your Adversary's Game, and make him ready prepared to pour in a strong Attack upon you, as soon as your weak one is over.

X.

Never play any Man 'till you have examined whether you are free from Danger by your Adversary's last Move; nor offer to attack 'till you have considered what Harm he would be able to do you by his next Moves in consequence of your's;

your's; that you may prevent his Designs, if hurtful, before it be too late.

XI.

When your Attack is in a prosperous Way, never be diverted from pursuing your Scheme (if possible) on to giving him Mate, by taking any Piece, or other Advantage, your Adversary may purposely throw in your Way, with the Intent, that by your taking that Bait, he might gain a Move that would make your Design miscarry.

XII.

When you are pursuing a well-laid Attack, but find it necessary to force your Way through your Adversary's Defence, with the Loss of some Pieces; if upon counting as many Moves forwards as you can, you find a Prospect of Success, rush on boldly, and sacrifice a Piece or two to gain your End: These bold Attempts make the finest Games.

XIII.

Never let your Queen stand so before your King, as that your Adversary, by bringing a Rook or a Bishop, might check your King if she were not there, for you might hardly chance to save her.

XIV.

Let not your Adversary's Knight (especially if duly guarded) come to check your
King

166 *Rules and Observations*

King and Queen, or your King and Rook, or your Queen and Rook, or your two Rooks, at the same time; for in the two first Cases, the King being forced to go out of Check, the Queen or the Rook must be lost; and in the two last Cases, a Rook must be lost, at best for a worse Piece.

XV.

Take care that no guarded Pawn of your Adversary's fork two of your Pieces.

XVI.

When the Kings have castled on different Sides of the Board, the Adversary must advance upon the other King the Pawns he has on that Side of the Board, taking care to bring his Pieces, especially his Queen and Rooks, to support them; and the King that has castled, is not to stir his three Pawns 'till forced to it.

XVII.

In playing the Game, endeavour to have a Move, as it were in Ambuscade; what is meant by it, is to place the Queen, Bishop, or Rook behind a Pawn, or a Piece in such a Manner, as that upon playing that Pawn, or Piece, you discover a Check upon your Adversary's King, and consequently may often get a Piece, or some other Advantage by it.

XVIII.

XVIII.

Never guard an inferior Piece with a better, if you can do it with a Pawn, because that better Piece may in that case be, as it were, out of Play; for the same Reason, you ought not to guard a Pawn with a Piece, if you have it in your Power to guard it with a Pawn.

XIX.

A Pawn passed, and well supported, often costs the Adversary a Piece. And if you play to win the Game only, whenever you have gained a Pawn, or any other Advantage, and are not in Danger of losing the Move thereby, make as frequent Exchanges of Pieces as you can.

XX.

If you have three Pawns each upon the Board, and no Piece, and you have one of your Pawns on one Side of the Board, and the other two on the other Side, and your Adversary's three Pawns are opposite to your two Pawns, march with your King, as soon as you can to take his Pawns, and if he goes with his King to support them, go on to Queen with your single Pawn, and if he goes to hinder him, take his Pawns, and push the others to Queen: This shews the Advantage of a pass'd Pawn.

XXI.

XXI.

At the latter End of a Game, each Party having only three or four Pawns on different Sides of the Board, the Kings are to endeavour to gain the Move in order to win the Game. For Example; if you bring your King opposite to your Adversary's King, with only one House between you, you will have gain'd the Move.

XXII.

When your Adversary has his King and one Pawn on the Board, and you have your King only, you will never lose that Game, if you can bring your King to be opposite to your Adversary's, when he is immediately either before, or on one Side of his Pawn, and there is only one House between the Kings.

XXIII.

When your Adversary has a Bishop and one Pawn on the Rook's Line, and his Bishop is not of the Colour that commands the Corner House his Pawn is going to, and you have only your King, if you can get into that Corner you can't lose that Game, but may win it by a Stale.

XXIV.

When you have greatly the Disadvantage of the Game, having only your Queen left in play, and your King happens to be in the Position of Stale-Mate,
keep

keep giving Check to your Adversary's King, always taking care not to check him where he can interpose any of his Pieces that makes the Stale; so doing, you will at last force him to take your Queen, and then you win the Game, by being in a Stale-Mate.

XXV.

Never cover a Check with a Piece that a Pawn push'd upon it may take, for fear of only getting that Pawn for it.

XXVI.

Always take care that your Adversary's King has a Move, for fear of giving a Stale-Mate; therefore don't crowd him up with your Pieces, lest you inadvertently give One.

Explanations and Applications of some of the foregoing Rules and Observations.

I.

WHETHER you play the open Game, or the close Game, be sure you bring out all your Pieces into play before you begin to attack; for if you don't, and your Adversary does, you will always attack, or be attack'd, at a great Disadvantage; this is so essential, that you

I

had

had better forego an Advantage than deviate from it ; and I may venture to pronounce, that no Person can ever play well at this Game, that does not put this Rule strictly in Practice ; and don't let any Body imagine, that these preparatory Moves are useless, because he does not receive an immediate Advantage from them ; they are just as necessary, as it is at Whist, to deal thirteen Cards round before you begin to play. In order to bring out your Pieces properly, I would advise to push on your Pawns first, and support them with your Pieces, and you will receive this Advantage from it, that your Game won't be crowded : I mean by this, that all your Pieces will be at Liberty to play and assist each other, and so co-operate towards obtaining your End ; and this farther is to be observ'd, that either in your Attack, or Defence, you bring them out so as not to be drove back again.

II.

When you have brought out all your Pieces, as I have premis'd, which you will have done very well, especially if you have your Choice on which Side to castle (which I would always advise to do) I would then pause a while, and consider thoroughly my own and my Adversary's Game, and from his Situation, and observing

serving where he is weakest, I would not only take my Resolution where to castle, but likewise where to begin my Attack; and it stands to Reason, you can't do it in a better Place than where you are strongest, and your Enemy weakest. By this Method 'tis very probable, that you will be able to break through your Adversary's Game, in which Fray some Pieces must of course be exchanged. But now pause again, and survey both Games attentively, and don't let your Impetuosity hurry you on too far with this first Success; and my Advice to you now in this critical Juncture (especially if you still find your Adversary pretty strong) is to rally your Men again, and put them in good Order for a second or third Attack if needful, still keeping your Men close and connected together, so as to be of Use to each other: For want of this Method, and a little Coolness, I have often seen an almost sure Victory snatch'd out of a Player's Hands, and a total Overthrow ensue. But, if after all, you can't penetrate so far as to win the Game, nevertheless, by observing these Directions, I apprehend you may still be very sure of having a well-disposed Game; and this brings me to the third Part of the Game, which is the Conclusion.

III.

And now that I am come to the last Period of the Game, which abounds also with Difficulties and Niceties ; it must be observ'd, where your Pawns are strongest, best connected together, and nearest to Queen ; you must likewise mind how your Adversary's Pawns are dispos'd, and in what Degree of Preferment they are ; and compare these Things together, and if you find you can get to Queen before him, you must proceed without Hesitation ; if not, you must hurry on with our King to prevent him : I speak now, as supposing all the Noblemen are gone ; if not they are to attend your Pawns, and likewise to prevent your Adversary from going to Queen.

Some general RULES, by way of Corroboration and Supplement to what has been already said.

I.

DON'T be too much afraid of losing a Rook for an inferior Piece : My Reason is this, altho' a Rook is better than any other, except the Queen, yet it seldom comes into play so as to operate until the End of the Game, and therefore it happens

pens very often, that 'tis better to have a less good Piece in play than a better out.

II.

When you have moved a Piece, so that your Adversary drives you away with a Pawn, take it for granted (generally speaking) that it is a bad Move, your Enemy gaining that double Advantage over you of advancing himself, and making you retire : I think this deserves Attention ; for altho' the first Move may not be much between equal and good Players, yet the Loss of one or two more, after the first, makes the Game almost irretrievable. Also, if you defend and can recover the Move, or the Attack, (for they both go together) you are in a fair Way of winning.

III.

If you make such a Move as that, having Liberty to play again, you can make nothing of it, take it for granted it is an exceeding bad one ; for at this nice Game no Move can be indifferent.

IV.

If your Game is such, that you have scarce any thing to play, 'tis your own Fault, either for having brought out your Pieces wrong, or which is worse, not at all ; for if you have brought them out right, you must have Variety enough to play.

V.

Don't be too much afraid of doubling a Pawn, three Pawns together are strong, but four, that make a Square, with the Help of other Pieces well-manag'd, make an invincible Strength, and, probably, in time of Need, may produce you a Queen: On the other Side, two Pawns with an Interval between, are no better than one; and if imprudently you should have three over each other in a Line, your Game can't be in a worse Situation: Examine this on the Table, and the Truth of it will strike you. Your Business, therefore, is to keep your Pawns close cemented and connected together, and it must be great Strength on the other Side that must overpower them.

VI.

When a Piece is so attack'd as that you can't save it, give it up, and bestow your Thoughts how to annoy your Enemy in another Place, whilst he is taking it; for it very often happens, that whilst your Adversary is running madly after a Piece, you either get a Pawn or two, or such a Situation as ends in his Destruction.

VII.

Supposing your Queen and another Piece are attack'd at the same time, and that by removing your Queen you must
lose

lose your Piece ; in this Case, if you can get two Pieces in exchange for your Queen, I would advise you rather to do it, than retire ; for observe, 'tis the difference of three Pieces, which is more than the worth of a Queen ; besides that you keep your Game entire, and preserve your Situation, which very often is better than a Piece ; nay, rather than retire, I would give my Queen for a Piece and a Pawn or two, nay, almost for what I can get ; for do but observe, amongst good Players, this one thing, (to convince you this Advice is not bad) that when the Attack and Defence is thoroughly form'd, and every thing prepar'd for the Storm, if he that plays first is oblig'd by the Act of the Person that defends to retire, it generally ends in the Loss of the Game of the attack'd Side.

VIII.

Don't aim at changing without Reason ; 'tis so far from being right, that a good Player will take this Advantage of it, that he will spoil your Situation and mend his own : But in these following Cases 'tis quite right ; when you are strongest, especially by a Piece, then every Time you change, your Advantage increases ; this is so plain it needs no Argument : Again, when you have play'd a Piece, and your Adversary opposes one to you, change

directly, for it is plain he wants to remove you ; prevent him therefore, and don't lose the Move.

IX.

Every now and then I would have you cast up your Game, and make the Balance, then take your Measures accordingly.

X.

At the latter End of the Game especially, remember your King is a Capital Piece, and don't let him be idle ; 'tis by his Means, generally, you get the Move and the Victory.

XI.

Observe this also, that as the Queen, Rook, and Bishop operate at a distance, 'tis not always necessary in your Attack, to have them near your Adversary's King ; they do better at a distance, can't be drove away, and prevent a Stale-Mate.

XII.

When you have a Piece that you can take, and that can't escape you, don't be in a hurry ; see where you can make a good Move elsewhere, and take it at your leisure.

XIII.

'Tis not always right, to take your Adversary's Pawn with your King, for very often it happens to be a Safeguard and Protection to your King.

XIV.

XIV.

When you can take a Man with different Pieces, don't do it with the first that occurs, but consider thoroughly with which you had best take it.

L A W S *at* C H E S S.

I.

IF you touch your Man, you must play it, and if you quit it you cannot recall it.

II.

If by Mistake, or otherwise, you play a false Move, and your Adversary takes no Notice of it till he hath play'd his next Move, neither of you can recall it.

III.

If you misplace your Men, and play two Moves, it lieth in your Adversary's Power or Choice whether he will permit you to begin the Game, or not.

IV.

If the Adversary playeth or discovereth a Check to your King, and gives no Notice of it you may let him stand so till he gives Notice.

V.

After your King has moved, you cannot Castle.

End of the Games of PIQUET *and* CHESS.

A SHORT TREATISE

On the GAME of

Back-Gammon.

CONTAINING

A TABLE of the thirty-six Chances, with Directions how to find out the Odds of being hit, upon single, or double Dice.

Rules whereby a Beginner may, with due Attention to them, attain playing it well.

The several Stages for carrying your Men home, in order to lose no Point.

How to find out who is forwardest to win a Hit.

Cases stated for Back-Games, with Directions how to play for one.

Cases stated, how to know when you may have the better of saving a Gammon by running.

Variety of Cases of Curiosity and Instruction.

The Laws of the Game.

T R E A T I S E.

On the GAME of

Back-Gammon.

C H A P. I.

BECAUSE it is necessary for a Learner to know, how many Points he ought to throw upon the two Dice, one Throw with another ; we shall take the following Method to demonstrate it.

Example. I would know how many Chances there are upon two Dice ?

The Answer is thirty-six

I would also know how many Points there are upon the thirty-six Chances ?

The

The Answer to which take as follows :

*Viz.**Points.*

2 Aces	—————	4
2 Deuces	—————	8
2 Trois	—————	12
2 Fours	—————	16
2 Fives	—————	20
2 Sixes	—————	24
6 and 5 twice	—————	22
6 and 4 twice	—————	20
6 and 3 twice	—————	18
6 and 2 twice	—————	16
6 and 1 twice	—————	14
5 and 4 twice	—————	18
5 and 3 twice	—————	16
5 and 2 twice	—————	14
5 and 1 twice	—————	12
4 and 3 twice	—————	14
4 and 2 twice	—————	12
4 and 1 twice	—————	10
3 and 2 twice	—————	10
3 and 1 twice	—————	8
2 and 1 twice	—————	6

————— *Points.*

Divided by 36

294	8
228	

6

294 divided by 36, solves the Question ; by which it appears, that one Throw with another

the Game of BACK-GAMMON. 183

another you may expect to throw 8 upon 2 Dice.

I would know how many Chances there are upon 2 Dice?

The Answer is 36, which are as follows:

		<i>Chances.</i>
2 Sixes	—————	1
2 Fives	—————	1
2 Fours	—————	1
2 Trois	—————	1
2 Deuces	—————	1
* 2 Aces	—————	1
6 and 5 twice	—————	2
6 and 4 twice	—————	2
6 and 3 twice	—————	2
6 and 2 twice	—————	2
* 6 and 1 twice	—————	2
5 and 4 twice	—————	2
5 and 3 twice	—————	2
5 and 2 twice	—————	2
* 5 and 1 twice	—————	2
4 and 3 twice	—————	2
4 and 2 twice	—————	2
* 4 and 1 twice	—————	2
3 and 2 twice	—————	2
* 3 and 1 twice	—————	2
* 2 and 1 twice	—————	2
	<hr/>	36

Because a Learner may be at a Loss to find out by this Table of 36 Chances, what are the Odds of being hit, upon a certain, or flat Die, let him take the following Method.

Example.

Example. To know the Odds of being hit upon an Ace?

Look in the Table, where, you will find thus * marked,

* 2 Aces	—	—	1
* 6 and 1 twice		—	2
* 5 and 1 twice	—	—	2
* 4 and 1 twice		—	2
* 3 and 1 twice		—	2
* 2 and 1	—	—	2
			—
	Total	11	

Which deducted from 36

The Remainder is 25

By this Method it appears, that it is 25 to 11 against hitting an Ace, upon a certain, or flat Die.

The

The like Method may be taken with any other flat Die, as you have seen with the Ace.

I would know what are the Odds of entering a Man upon 1, 2, 3, 4, or 5 Points?

Answer.

Reduced.

		<i>for.</i>		<i>agt.</i>			<i>for.</i>		<i>agt.</i>
To enter it	{	upon 1 Point is	11	to 25	}	or about	4	to	9
		upon 2 Points	20	16			5		4
		upon 3 Points	27	9			3		1
		upon 3 Points	32	4			8		1
		upon 5 Points	35	1			35		1

I would know what are the Odds of hitting, with any Chance, in the Reach of a single Die ?

Answer.

Reduced.

	<i>for.</i>	<i>agt.</i>		<i>for.</i>	<i>agt.</i>
To hit	upon 1	is 11	to 25	or about	4 to 9
	upon 2	12	24	1	2
	upon 3	14	22	2	3
	upon 4	15	21	5	7
	upon 5	15	21	5	7
	upon 6	17	19	$8\frac{1}{2}$	$9\frac{1}{2}$

I would know what are the Odds of hitting with double Dice ? which are as follows :

Answer.

Reduced.

		<i>for.</i> <i>agt.</i>		<i>for.</i> <i>agt.</i>	
To hit	upon 7	is	6 to 30	or about	1 to 5
	upon 8		6 30		1 5
	upon 9		5 31		1 6
	upon 10		3 33		1 11
	upon 11		2 34		1 17
	upon 12 (or 26's)		1 36		1 35

To explain further to a Learner how to make use of the Table of 36 Chances, when at a Loss to find the Odds of being hit upon any certain, or flat Die, this second Example is here added to shew how to find by that Table the Odds of being hit upon a 6.

2 Sixes	—	1
2 Trois	—————	1
2 Deuces	—————	1
6 and 5 twice	—	2
6 and 4 twice	—————	2
6 and 3 twice	—————	2
6 and 2 twice	—————	2
6 and 1 twice	—————	2
5 and 1 twice	—————	2
4 and 2 twice	—————	2
	—	17

Which deducted from 36

The Remainder is — 19

By the foregoing Example it is evident, that it is 19 to 17 against being hit upon a 6.

The Odds of 2 Love is about 5 to 2,
and of 2 to 1 is 2 1,
and of 1 Love is 3 2.

C H A P.

C H A P. II.

I.

IF you play 3 up at *Back-Gammon*, your principal View, in the first place, is, either to secure your own, or your Adversary's *Cinq. Point*; when that is effected, you may play a pushing Game, and endeavour to gammon your Adversary.

II.

The next best Point (after you have gain'd your *Cinq. Point*) is to make your *Barr Point*, thereby preventing your Adversary's running with 2 Sixes.

III.

After you have proceeded thus far, you are, in the next place, to prefer the making your *Quatre Point* in your own Tables, rather than the *Quatre Point* out of them.

IV.

Having gained these Points, you have a fair Chance to gammon your Adversary, if he is very forward: For, suppose his Tables are broke at home, it will be then your Interest to open your Barr Point, and to oblige him to come out of your Tables with a 6; and having your Men spread, you not only may catch that Man
which

which your Adversary brings out of your Tables, but you will also have a Probability of taking up the Man left in your Tables, (upon Supposition that he had two Men there.) And suppose he should have a Blot at home, it will then be your Interest not to make up your Tables; because, if he should enter upon a Blot, which you are to make for the Purpose, you will have a Probability of getting a third Man; which, if accomplished, will give you, at least, 4 to 1 of the Gammon; whereas, if you have only two of his Men up, the Odds is in his Favour that you do not gammon him.

V.

If you play for a Hit only, 1 or 2 Men taken up of your Adversary's, makes it surer than a greater Number, provided that your Tables are made up.

VI.

DIRECTIONS how to carry your Men home.

When you carry your Men home, in order to lose no Point, you are to carry the most distant Man to your Adversary's Barr Point, that being the first Stage you are to place it on; the next Stage is 6 Points farther, *viz.* in the Place where your Adversary's 5 Men are first placed out of his Tables; the next Stage is upon the

the Game of BACK-GAMMON. 191

the six Point in your Tables. This Method is to be pursued till all your Men are brought home, except 2, when, by losing a Point, you may often save your Gammon, by putting it in the Power of 2 Fives, or 2 Fours to save it.

VII.

If you play to win a Hit only, you are to endeavour to gain either your own or your Adversary's *Cinque* Point ; and if that fails, by your being hit by your Adversary, and you find that he is forwarder than you, in that Case, you must throw more Men into his Tables. The manner of doing it is thus : Put a Man upon your *Cinque* or Barr-Point, and if your Adversary neglects to hit it, you may then gain a forward Game instead of a back Game ; but if he hits you, you must play for a back Game, and then the greater Number of Men which are taken up, makes your Game the better, because you will, by that Means, preserve your Game at home ; and you must then always endeavour to gain both your Adversary's Ace and Trois Points, or his Ace and Deuce Points, and take Care to keep 3 Men upon his Ace Point, that, if you chance to hit him from thence, that Point may remain still secure to you.

VII.

At the Beginning of a Set do not play for a back Game; because by so doing, you would play to a great Disadvantage, running the Risk of a Gammon to win a single Hit.

C H A P. III.

DIRECTIONS *for playing at setting out the 36 Chances of Dice, when you are to play for a Gammon, or for a single Hit.*

I.

TWO Aces, to be played on your Cinq-Point, and Barr-Point, for a Gammon, or for a Hit.

II.

Two Sixes, to be played on your Adversary's Barr-Point, and on your own Barr-Point, for a Gammon, or for a Hit.

III.

* Two Trois; two to be played on your Cinq-point, and the other two on your Trois Point in your own Tables, for a Gammon only.

IV.

† Two Deuces, to be played on your
Quatre

the Game of BACK-GAMMON. 193

Quatre Point in your own Tables, and two to be brought over from the five Men placed in your Adversary's Tables, for a Gammon only.

V.

‡ Two Fours, to be brought over from the five Men placed in your Adversary's Tables, and to be put upon the Cinq. Point in your own Tables, for a Gammon only.

VI.

Two Fives, to be brought over from the five Men placed in your Adversary's Tables, and to be put on the Trois Point in your own Tables, for a Gammon, or for a Hit.

VII.

Size Ace, you are to take your Barr Point, for a Gammon, or for a Hit.

VIII.

Size Deuce, a Man to be brought from the five Men placed in your Adversary's Tables, and to be placed on the Cinq. Point in your own Tables, for a Gammon, or for a Hit.

IX.

Six and three, a Man to be brought from your Adversary's Ace Point, as far as he will go, for a Gammon, or for a Hit.

X.

Six and four, a Man to be brought from
K your

your Adversary's Ace-point, as far as he will go, for a Gammon, or for a Hit.

XI.

Six and Five, a Man to be carried from your Adversary's Ace-point as far as he can go, for a Gammon, or for a Hit.

XII.

Cinq. and Quatre, a Man to be carry'd from your Adversary's Ace-point, as far as he can go, for a Gammon, or for a Hit.

XIII.

Cinq. Trois, to make the Trois-point in your Table, for a Gammon, or for a Hit.

XIV.

Cinq. Deuce, to play two Men from the 5 placed in your Adversary's Tables, for a Gammon, or for a Hit.

XV.

* Cinq. Ace, to bring one Man from the five placed in your Adversary's Tables for the Cinq. and to play one Man down on the Cinq. Point in your own Tables for the Ace, for a Gammon only.

XVI.

Quatre Trois, two Men to be brought from the five placed in your Adversary's Tables, for a Gammon, or for a Hit.

XVII.

Quatre Deuce, to make the Quatre
Point

Point in your own Tables, for a Gammon, or for a Hit.

XVIII.

† Quatre Ace, to play a Man from the 5 placed in your Adversary's Tables for the Quatre, and for the Ace, to play a Man down upon the Cinq. Point in your own Tables, for a Gammon only.

XIX.

Trois Deuce, two Men to be brought from the five placed in your Adversary's Tables, for a Gammon only,

XX.

Trois Ace, to make the Cinq. Point in your own Tables, for a Gammon, or for a Hit.

XXI.

* Deuce Ace, to play one Man from the five Men placed in your Adversary's Tables for the Deuce; and for the Ace, to play a Man down upon the Cinq. Point in your own Tables, for a Gammon only.

?

DIRECTIONS how to play the Chances that are marked thus () when you are only to play for a Hit.*

I.

* **T**WO Trois, two of them are to be played on your Cinq. Point in your own

own Tables, and with the other Two you are to take the Quatre Point in your Adversary's Tables.

II.

† Two Deuces, two of them are to be played on your Quatre Point in your own Tables, and with the other two you are to take the Trois Point in your Adversary's Tables.

The two foregoing Cases are to be played in this manner, for this Reason, *viz.* That thereby you avoid being shut up in your Adversary's Tables, and have the Chance of throwing high Doublets to win the Hit.

III.

* Two Fours, two of them are to take your Adversary's Cinq. Point in his Tables; and for the other two, two Men are to be brought from the five placed in your Adversary's Tables.

IV.

1. * Cinq. Ace, play the Cinq. from the five Men placed in your Adversary's Tables, and play the Ace from your Adversary's Ace Point.

V.

2 * Quatre Ace, play the Quatre from the five Men placed in your Adversary's Tables, and play the Ace from the Men on your Adversary's Ace Point.

VI.

VI.

3. * Deuce Ace, play the Deuce from the five Men placed in your Adversary's Tables, and play the Ace from your Adversary's Ace Point.

N. B. The three last Chances are play'd in this manner, for the following Reason: By laying an Ace down in your Adversary's Tables, you have a Probability of throwing Deuce Ace, Trois Deuce, Quatre Trois, or Size Cinq. in two or three Throws; in any of which Cases you are to take a Point, which gives you vastly the better of the Hit.

You may observe, by the Directions given in this Chapter, that you are to play 9 Chances out of the 36 in a different manner for a single Hit, to what you would do when playing for a Gammon.

In this, and the foregoing Chapter, plain Directions are given, how, at setting out, to play all the Chances on the Dice, either for a Gammon, or a single Hit; but it is impossible to give full Instructions for the whole Progress of the Game; all that can be done towards helping a Learner, is to communicate some *Observations, Hints, and Cautions*, which if attended to, may be of Use to him.

CHAP. V.

Some OBSERVATIONS, HINTS, and CAUTIONS, which are to be attended to.

I.

BY the Directions given to play for a Gammon, you are voluntarily to make some Blots, the Odds being in your Favour, that they are not hit; but, should it so happen, that any Blot is hit, as in this Case you will have three Men in your Adversary's Tables, you must then endeavour to secure your Adversary's Cinq. Quatre, or Trois Point, to prevent a Gammon, and must be very cautious how you suffer your Adversary to take up a fourth Man.

II.

Take care not to crowd your Game at any time, if possible. What is meant by crowding a Game, is the putting many Men either upon your Trois or Deuce Point in your own Tables; which is, in effect, losing of those Men, not having them in Play.

Besides, by crowding your Game, to attempt to save a Gammon, you are often gammoned;

gammoned ; because when your Adversary finds your Game open, by being crowded in your own Tables, he may then play his Game as he thinks fit.

III.

By Recourse had to the Calculations, you may know what are the Odds of your entering a single Man upon any certain Number of Points, and by that means you may play your Game accordingly.

IV.

If you are obliged to leave a Blot, by Recourse had to the Calculations for hitting it, you will find the Chances for and against you ; and consequently you will be enabled to judge how to play your Game to the greatest Advantage.

V.

You will also find by the Calculations, the Odds for and against you, upon being hit by double Dice, and consequently you will have it in your Power to chuse such a Method of Play as is most to your Advantage.

VI.

If it is necessary to make a Run in order to win a Hit, and you would know to a Point which is forwardest, your Adversary or you, take the following Method:

Begin with reckoning how many Points

you must have to bring home to your Size Point in your own Tables, the Man that is at the greatest Distance from it, and do the like by every other Man that is abroad ; when the Numbers of those Absentees are summed up, add to them the following Numbers for those already in your own Tables, (supposing the Men that were abroad as on your Size Point for bearing) namely, six for every Man on the Size Point, five for every Man on the Cinque Point, four for every Man on the Quatre Point, three for every Man on the Trois point, two for every Man on the Deuce Point, and one for every Man on your Ace Point. Do the like to your Adversary's Game, and then you will know which of you is forwardest, and likeliest to win the Hit.

CHAP. VI.

Observations and Directions for a Learner that has made some Progress at Back-Gammon; particular Directions for bearing their Men.

I.

IF your Adversary is greatly before you, never play a Man from your Quatre, Trois, or Deuce Points, in order to bear that Man from the Point where you put it, because that nothing but high Doublets can give you any Chance for the Hit; therefore, instead of playing an Ace or a Deuce from any of the aforesaid Points, always play them from your Size or highest Point; by which means you will find, that throwing two fives, or two fours, will, upon having eased your Size and Cinque Points, be of great Advantage to you: Whereas, had your Size Point remained loaded, you must, perhaps, be obliged to play at length those Fives, and Fours.

II.

Whenever you have taken up two of your Adversary's Men, and that you hap-

pen to have two, three, or more Points made in your own Tables, never fail spreading your Men, in order either to take a new Point in your Tables, or to be ready to hit the Man your Adversary may happen to enter. As soon as he enters one of his Men, you are to compare his Game with your's; and if you find your Game equal to his, or better, never fail taking his Man up, if you can, because it is 25 to 11 against his hitting you; which Chance, being so much in your Favour, you ought always to run that Risk, when you have already two of his Men up.

There is this Exception to this Rule, that if you play for a single Hit only, and that your playing that Throw otherwise, gives you a better Chance for the Hit, you ought not to take up that Man.

III.

Never be deterred from taking up any one Man of your Adversary's by the Apprehension of his hitting you with double Dice, because the fairest Probability your Adversary has of hitting you, is five to one against him.

IV.

If you should happen to have five Points in your Tables, and to have taken
up

up one of your Adversary's Men, and are obliged to leave a Blot out of your Tables, take care, if it is in your Power, rather to leave it upon Doublets, than any other Chance, because Doublets are 35 to 1 against his hitting you, and any other Chance is but 17 to 1 against him.

V.

Two of your Adversary's Men in your Tables are better for a Hit, than any greater Number, provided your Game is forwardest, because his having three or more Men in your Tables, gives him more Chances to hit you, than if he had only two Men in them.

VI.

If you are to leave a Blot, upon your entering of a Man in your Adversary's Tables, or otherwise, and have it in your Choice to leave it upon what Point you please, always chuse that which is the most disadvantageous to him. To illustrate this by an Example, let us suppose it is his Interest to hit you or take you up as soon as you enter, in that Case you are to leave the Blot upon his lowest Point; that is to say, upon his Deuce Point, rather than upon his Trois Point, or upon his Trois Point preferably to his Quatre Point, or upon his Quatre Point preferable to his

Cinque-point, because, (as has been mentioned before) all the Men your Adversary plays upon his Trois, or his Deuce-points, are deemed as lost, being in a great Measure out of Play, those Men not having it in their Power to make his Cinque-point, and consequently his Game will be crowded there and open elsewhere, whereby you will be able also much to annoy him.

VII.

To prevent your Adversary from bearing his Men to the greatest Advantage, when you are running to save your Gammon; as, for instance, suppose you should have two Men upon his Ace-point, and several other Men abroad, tho' you should lose one Point or two in putting your Men into your Tables, yet it is your Interest to leave a Man upon your Adversary's Ace-point, which will have this Consequence, that it will prevent his bearing his Men to his greatest Advantage, and will also give you the Chance of his making a Blot, which you may chance to hit. But if, upon a Calculation, you find that you have a Throw, or a Probability of saving your Gammon, never wait for a Blot, because the Odds are greatly against hitting it.

C H A P. VII.

Cases, put by way of Examples, to shew how to calculate the Odds of saving or winning a Gammon.

I.

SUPPOSE your Tables are made up, and that you have taken up one of your Adversary's Men ; and suppose your Adversary has so many Men abroad as require three Throws to put them in his Tables ;

Query, Whether you have the better of a Gammon, or not ?

Answer, It is about an equal Wager that you Gammon him.

Because, in all Probability, you will have bore two Men before you open your Tables, and when you bear the third Man, you will be obliged to open your Size or Cinque-point ; in that Case it is probable, that your Adversary must take two Throws before he enters his Man in your Tables, and two Throws more before he puts that Man into his own Tables, and three Throws more to put into his own Tables the Men which he has abroad, which in all make seven Throws :
And

And as you have twelve Men to bear, which probably will take seven Throws in bearing, because you may twice be obliged to make an Ace, or a Deuce, before you can bear all your Men.

N. B. No mention is made of Doublets of either Side, that Event being equal to each Party.

The foregoing Case being duly attended to, shews it is in your Power to calculate very nearly the Odds of saving or winning a Gammon upon most Occasions.

II.

Suppose I have three Men upon my Adversary's Ace-point, and five Points in my Tables, and that my Adversary has all his Men in his Tables, three upon each of his five highest Points;

Query, Whether the Probability is for his gammoning me, or not?

Answer.

Points.

For his bearing 3 Men from his 6 Point, is	18
from his 5 Point, -	15
from his 4 Point, -	12
from his 3 Point, -	9
from his 2 Point, -	6

Total, - - - 60

To

the Game of BACK-GAMMON. 207

To bring my 3 Men from my
Adversary's Ace Point, to my
Size Point in my Tables, be-
ing for each 18 Points, make
in all

————	————	————	54
			—
The Remainder is			6

And as besides the fix Points in your Favour, there is a further Consideration to be added for you, which is, that your Adversary may make one or two Blots in bearing, as is frequently the Case : You see by this Calculation, that you have greatly the better of the Probability of saving your Gammon.

N. B. This Case is supposed upon an Equality of throwing.

III.

Suppose I lead two Blots, either of which cannot be hit but by double Dice, to hit the one that Cast must be eight, and to hit the other it must be nine ; by which means my Adversary has only one Dye to hit either of them.

Query, What are the Odds of his hitting either of these Blots?

Answer,

The Chances on two Dice are in all, 36.

The

The Chances to hit 8 are,	{	6 and 2 twice,	-	2
		5 and 3 twice,	-	2
		2 Deuces.	- - -	1
		2 Fours,	- - - -	1

The Chances to hit 9 are,	{	6 and 3 twice,	- -	2
		5 and 4 twice,	- -	2
		2 Trois,	- - - -	1

Total Chances for hitting, - - 11

Remain Chances for not hitting, 25

So that it is 25 to 11 that he will not hit either of those Blots.

IV.

To give another Example, let us suppose that I leave two other Blots than the former, which cannot be hit but by double Dice, the one must be hit by eight, and the other by seven.

Query, What are the Odds of my Adversary's hitting either of these Blots?

Answer.

The Chances on two Dice are in all, 36

The Chances to hit 8 are,	{	6 and 2 twice,	- -	2
		5 and 3 twice,	- -	2
		two Fours,	- - -	1
		two Deuces,	- - -	1

The

The Chances to hit 7 are,	{	6 and 1 twice, - - -	2
		5 and 2 twice, - - -	2
		4 and 3 twice, - - -	2

Total Chance for hitting, - - - 12

Remain Chances for not hitting, 24

Therefore it is two to one, that I am not hit.

The like Method is to be taken with three, four, or five Blots upon double Dice; or with Blots made upon double and single Dice at the same time; you are then only to find out (by the Table of 36 Chances) how many there are to hit any of those Blots, and add all together in one Sum, which subtract from the Number 36, which is the whole of the Chances upon two Dice: So doing resolves any Question required.

V.

The following Cases are to shew a way of calculating, which may be called a mechanical way of solving of Questions of the like Nature.

I would know what are the Odds of throwing 7 twice, before 10 once?

Answer.

It is 5 to 4 that 10 is thrown once before

7 is thrown twice, which is demonstrated, as follows :

Suppose the Stake depending is nine Pounds, my first Throw entitles me to have one third Part of that Money, because 7 has six Chances for it, and 10 has but three Chances, and therefore it is two to one.

	<i>l.</i>	<i>s.</i>	<i>d.</i>
For the first Throw - - - -	3	0	0
Having taken 3 <i>l.</i> out of the 9 <i>l.</i> for the first Throw, the Re- mainder is 6 <i>l.</i> out of which a third Part is to be taken for the second Throw, - - - -	2	0	0

The Total is,	5	0	0
Remains,	4	0	0

The whole Stake is,	9	0	0
---------------------	---	---	---

VI.

I would know what are the Odds of entering a Man upon any certain Point in two Throws?

Answer.

Suppose 36 Shillings is the whole Stake depending, I would know what is my Share of that Stake, having laid 18 Shillings that I enter into two Throws? By the Calculations in the Table of 36 Chances,

the Game of BACK-GAMMON. 211

Chances, it is found that I have 11 Chances out of the 36 for entering the first Throw, for which therefore I am entitled to 11 out of the 36 Shillings.

The Stake is,	—	—	s.	d.
			36	0
			<hr/>	

For the first Throw,	—		s.	d.
			11	0
			<hr/>	

Remains,	—		s.	d.
			25	0
			<hr/>	

The Remainder, being 25 Shillings, is to be divided into 36 equal Parts, of which I am entitled to eleven of those Parts, which makes 7s. 7d. $\frac{1}{2}$ for the second Throw,

			s.	d.
			7	7 $\frac{1}{2}$
			<hr/>	

Adding this to the other 11 Shilling, makes my Share of the Stake to be,

			s.	d.
			18	7 $\frac{1}{2}$
			<hr/>	

Then my Adversary's Share will be

			s.	d.
			17	4 $\frac{1}{2}$
			<hr/>	

Total of the Stake.			s.	d.
			36	0
			<hr/>	

Therefore it is very nearly 15 to 11 in favour of entering a Man upon any certain Point in two Throws.

C H A P.

C H A P. VIII.

Critical Cases for a Back-game.

I.

LET us suppose *A.* plays the Fore-Game, and that all his Men are placed in the usual Manner.

For *B.*'s Game let us suppose, that 14 of his Men are placed upon his Adversary's Ace Point, and 1 Man upon his Adversary's Deuce Point, and that *B.* is to throw.

Query, Which Game is likeliest to win the Hit?

Answer, *A.*'s is the best by Gold to Silver, or 21 *for*, to 20 *against*; because, if *B.* misses an Ace to take his Adversary's Deuce-point, which is 25 to 11 against him, *A.* is, in that Case, to take up *B.*'s Men in his Tables, either singly, or to make Points; and if *B.* secures either *A.*'s Deuce or Trois-point, in that Case, *A.* is to lay as many Men down as possible, in order to be hit, that thereby he may get a Back-Game.

When you are pretty well versed in the Game of Back-Gammon, by practising this Back-Game, you will become a greater

greater Proficient in the Game than by any other Method, because it clearly demonstrates the whole Power of the Back-Game.

II. *Back-Game.*

Let us suppose *A.* to have five Men placed upon his Size Point, five Men upon his Quatre Point, and five Men upon his Deuce Point, all in his own Tables.

And let us suppose *B.* to have three Men placed upon *A's* Ace-point, three Men upon *A's* Trois-point, and three Men upon *A's* Cinque-point; let *B.* also have three Men upon his Size-point in his own Tables, and three Men placed out of his Tables, in the usual Manner.

Query, Who has the better of the Hit?

Answer, It is an equal Game; but to play it critically, the Difficulty lies upon *B.* who is in the first place to endeavour to gain his Cinque and Quatre-points in his own Tables, and when that is effected, he is to play two Men from *A's* Cinque Port, in order to oblige his Adversary to blot, by throwing an Ace, which if *B.* hits, he will have the fairest Probability of winning the Hit.

III. *Back-Game.*

Suppose *A.* has three Men upon *B*'s Ace-point, and three Men upon *B*'s Deuce Point, also three Men upon his Size-point in his own Tables, and three Men upon his usual Point out of his Tables, and three Men where his five Men are usually placed in his Adversary's Tables.

And let us suppose *B.* has his Men placed in the same Manner, both in his own and his Adversary's Tables, with this Difference only, *viz.* instead of having three Men put upon *A*'s Deuce-point, let him have three Men upon *A*'s Trois-point.

Query, Who has the best of the Hit?

Answer, *A.* because the Ace and Trois Point are not so good for a Hit, as the Ace and Deuce-points in your Adversary's Tables, for this Reason, because when you are bearing your Men, you have the Deuce-point in your own Tables to play your Men upon, which often prevents your making a Blot, which must happen otherwise to your Adversary; and take care to lay down Men to be hit as often as you can; in order to keep your Game backward, and for the same Reason avoid hitting any Blots which your Adversary makes.

IV.

IV.

As a Case of Curiosity and Instruction.

Let us suppose *A.* has his 15 Men upon *B.*'s Ace-point, *B.* is supposed to have his Barr-point, also his Size, Cinque, Quatre, and Trois-points in his own Tables.

Query, How many Throws is *A.* likely to take to bring his 15 Men into his own Tables, and to bear them?

Answer, You may undertake to do it in seventy-five Throws.

It is Odd in *A.*'s Favour that he throws an Ace in two Throws; it is also Odds in *A.*'s Favour that he throws a Six in two Throws; when these Events happen, *A.* has a Probability of not wanting above two or three Throws to play, till he has got all his fifteen Men into his own Tables: Therefore, by a former Rule laid down to bring your Men home, and also for bearing your Men, you may be able to find out the Probability of the Number of Throws required. *Note,* *B.* stands still, and does not play.

A Case of Curiosity and Instruction.

Where *A.* and *B.* shall play as fast as usual and yet *A.* shall make the Hit last, probably, for many Hours.

We will suppose *B.* to have bore 13 Men, and that *A.* has taken up the two remaining Men.

And let us suppose that *A.* has his 15 Men in *B.*'s Tables, *viz.* three Men upon his Size-point, three upon his Cinque-point, three upon his Quatre-point, three upon his Trois-point, two upon his Deuce-point, and one upon his Ace-point.

The Method, which *A.* is to take, is this: Let him bring his 15 Men home, by always securing six close Points, till *B.* has entered his two Men, and brought them upon any certain Point; as soon as *B.* has gained that Point, *A.* must open an Ace, Deuce, or Trois, or all three; which effected, *B.* hits one of them, and *A.* taking Care to have two or three Men in *B.*'s Tables, is ready to hit that Man; and also, he being assured of taking up the other Man, has it in his Power to prolong the Hit to almost any Length, provided he takes Care not to open such Points, as two Fours, two Fives, or two Sixes,

Sixes, but always to open the Ace, Deuce, or Trois Points for B. to hit him.

VI.

I would know what are the Odds upon two Dice, for throwing two Sixes, two Fives, or two Fours, in three Throws? which by mechanical Calculation, may be found thus:

Answer, Supposing 36 Shillings to be the Stake depending, the Thrower will be entitled to have for his first Throw, - 3 *shil.* which deducted out of 36, remains

33; which divided again into 36 Parts, make so many Eleven Pence, out of which the Thrower is to have s. d. 3 for his second Throw, - - - 2 9

The Remainder, 30 Shillings and 3 Pence, is again to be divided into 36 Parts; dividing the 30s. so, make so many Ten Pence, and the 3 Pence divided into so many Parts makes so many Thirds of Farthings, of which the Thrower is to have 3 Parts s. d. for his Share for his third Throw — 2 6 $\frac{1}{4}$

Total for the Thrower, 3 8 $\frac{1}{4}$

So that it is 27s. 8d. $\frac{1}{4}$ to 8s. 3d. $\frac{1}{4}$ against the Thrower; which reduced into the smallest Number, is very nearly as 10 to 3, that 2 Sixes, 2 Fives, or 2 Fours, are not thrown in three Throws.

VII.

B A C K - G A M E.

Suppose *A.* to have 2 Men upon his Size-point in his own Tables, 3 Men upon his usual Point out of his Tables, 2 Men upon the Point where his 5 Men are usually placed in his Adversary's Tables, 5 Men upon his Adversary's Ace-point, and 3 Men upon his Adversary's Quatre-point.

And let us suppose *B.* to have 2 Men upon his Size-point in his own Tables, 3 Men upon his usual Point, out of his Tables, 2 Men upon the Point where his 5 Men are usually placed in his Adversary's Tables, 5 Men upon his Adversary's Ace-point, and 3 Men upon his Adversary's Trois-point.

Query, Who has the fairest Chance to win the Hit.

Answer, *A.* has, because he is to play either an Ace, or a Deuce from his Adversary's Ace-point, in order to make both those Points as Occasion offers, and having the Quatre-point in his Adversary's Tables, he may more easily bring those Men away, if he finds it necessary, and he will also have a resting Place by the Conveniency of that Point, which at all times in the Game will give him an Opportunity

Opportunity of running for the Hit, or staying, if he thinks proper. Whereas *B.* cannot so readily come from the Trois Point in his Adversary's Tables.

C H A P. IX.

I.

LET us suppose *A.* and *B.* place their Men in the following manner for a Hit.

Suppose *A.* to have 3 Men upon his Size-point in his own Tables, three Men upon the usual Point out of his Tables, and 9 Men upon his Adversary's Ace, Deuce, and Trois Points, 3 Men to be placed upon each Point; and suppose *B.*'s Men to be placed in his own, and in his Adversary's Tables, in the same Order and Manner.

The Result is, that the best Player ought to win the Hit; and the Dice are to be thrown for, the Situation being perfectly equal in *A.*'s and *B.*'s Game.

If *A.* throws first, let him endeavour to gain his Adversary's Cinque Point; when that is effected, let him lay as many Blots as possible, to tempt *B.* to hit him; for every time that *B.* hits them will be in

A's Favour, because it puts him backward; and let *A.* take up none of *B*'s Men for the same Reason.

A. is always to endeavour to take Care to have three Men upon each of his Adversary's Ace and Deuce-points; because when *B.* makes a Blot, those Points will remain secure, and by Recourse had to a former Case (*Numb.* V. in the former Chapter) when *A.* has bore 5, 6, or more Men, yet *A.* may secure 6 close Points out of his Tables, in order to prevent *B.* from getting his Man home, and by Recourse had to the Calculations, he may easily find out (in Case he makes up his Tables) who has the better of the Hit; and if he finds that *B.* is forwardest, he is then to endeavour to lay such Blots to be taken up by his Adversary, as may give him a Chance for taking up another Man, in Case *B.* should happen to have a Blot at home.

Those who play the foregoing Game well, may be ranked in the first Form.

II.

A Case of Curiosity.

A. and *B.* play at Back-Gammon, *A.* has bore 13 Men and has 2 Men to bear upon his Deuce-point, *B.* has 13 Men in his own Tables, with two Men to enter. *B.* is to throw. — And to name the Throws both for himself and *A.* but not to hit a Blot of either Side.

Query

Query, What Throws is *B.* to name for both Parties, in order to save his Gammon?

Answer, *B.* calls for himself 2 Aces, which enters his 2 Men upon *A.*'s Ace Point. *B.* also calls 2 Aces for *A.* and consequently *A.* cannot either bear a Man nor play one; then *B.* calls for 2 Sixes, for himself, and carries one Man home upon his Size Point in his own Tables, and the other he places upon his Adversary's Barr-point: *B.* also calls Size-ace for *A.* so that *A.* has one Man left to bear, and then *B.* calls for himself either 2 Sixes, 2 Fives, or two Fours, any of which bear a Man, in Case he has Men in his own Tables upon those Points, and to save his Gammon.

III.

The following Question is to be attended to, as being Critical and Instructive.

Suppose that both yours and your Adversary's Tables are made up.

Also that you have 1 Man to carry home, but that he has 2 Men on your Barr-point to carry home, which lye in wait to catch your Man, and that if you pass him you are to win the Hit. Suppose also that you have it in your Choice to run the Risk of being hit, by 7, or by

8, both of which are Chances upon double Dice.

Query, Which of these Chances is it best for you to venture?

Answer, That of 7, for the following Reasons: *First*, because that the Chances being hit by 7, or by 8, are equal.

Secondly, If he does not hit 7, you will then have in your Favour 23 Chances to 13, that by your next Throw you either hit him or pass beyond him.

Thirdly, In Case your second Throw should happen to be under 7, and that consequently you cannot hit him, yet you may play that Cast at home, and consequently leave the Blot upon double Dice.

Whereas, if on the contrary, you had made Choice of leaving the Blot upon 8, you would have made a bad Choice, for the Reasons following:

First, Because the Chances for being hit by 7, or by 8, are only equal.

Secondly, Because if you should escape the being hit by 8, yet you would then have but 17 Chances in your Favour, against 19 for either hitting him, or passing beyond him by your next Throw.

Thirdly, In case your second Throw should happen to be Size-ace, which is short of him, you would then be obliged to play the Man that is out of your Tables,

bles, not being able to play the fix at home, and consequently to leave a Blot to be hit by a single (or flat) Dye ; which Event, upon Supposition that you play for 18 Shillings a Game, it would entitle him to 11 Shillings of the whole Stake depending.

The LAWS of BACK-GAMMON.

1st. **I**F you take a Man from any Point, that Man must be played ; the same must be done if 2 Men are taken from it.

2^d. You are not understood to have played any Man, till you have placed him upon a Point and quitted him.

3^d. If you play with 15 Men only, there is no Penalty attending it, because by playing with a lesser Number than you are entitled to, you play to a Disadvantage, by not having the additional Man to take up your Tables.

4th. If you bear any Number of Men, before you entered a Man taken up, and which consequently you was obliged to enter, such Men, so born, must be entered again in your Adversary's Tables, as well as the Man taken up.

5th. If you have mistaken your Throw, and played it, and if your Adversary

has thrown, it is not in your or his Choice to alter it, unless both Parties agree to it.

End of the GAME of BACK-GAMMON.
